Archaeology, Annales, and Ethnohistory A. Bernard Knapp, 1992-04-16 This collection considers the relevance of the Annales school for archaeology The Annales movement regarded orthodox history as too much concerned with events too narrowly political too narrative in form and too isolated from neighbouring disciplines Annalists attempted to construct a total history dealing with a wide range of human activity and combining divergent material documentary and theoretical approaches to the past Annales oriented research utilizes the techniques and tools of various ancillary fields and integrates temporal spatial material and behavioural analyses Such an approach is obviously attractive to archaeologists for even though they deal with material data rather than social facts they are just as much as historians interested in understanding social economic and political factors such as power and dominance conflict exchange and other human activities Three introductory essays consider the relationship between Annales methodology and current archaeological theory Case studies draw upon methodological variations of the multifaceted Annales approach The volume concludes with two overviews one historical and the other archaeological

trade language development and differentiation institutions of enslavement and of freedom traditions of marriage and child rearing the emergence of large scale political organization from early kingdoms to vast empires republics and federations and the management of war and peace To deal with such challenging issues global historians draw upon new techniques of analysis and comparison But they also continue venerable traditions inherited from the earliest civilizations of narrating the past on the most comprehensive and significant scale possible This book examines the long search for an integrated human story and particularly the points at which rapid changes of philosophy and perspective in the twentieth century transformed the historical disciplines It provides the perfect introduction to global history for students and scholars alike

Re-Envisioning Global Development Sandra Halperin, 2013-04-17 Re Envisioning Global Development offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies development economics and political science
