Miracles in Enlightenment England Jane Shaw, 2006-01-01 The Enlightenment considered an age of rationalism is not normally associated with miracles In this intriguing book however Jane Shaw presents accounts of inscrutable miracles that occurred to ordinary worshippers in early modern England She considers the reactions of intellectuals scientists and physicians to

these miraculous events and through them explores the relations between popular and elite culture of the time. Miraculous events in England between the 1650s and the 1750s were experienced mainly not by Catholics but by Protestants. The book looks at the political and social context of these events as well as interpretations and explanations of them by scientists, the Court and the Church as well as by preachers, pamphleteers, friends and neighbors. Shaw links the lived religion of the time to intellectual history and amends the hitherto received view. The religious practice of ordinary people was as crucial to the development of Enlightenment thought as the philosophical and theological writings of the elite.

Transportation Amid Pandemics Junyi Zhang, Yoshitsugu Hayashi, 2022-09-18. Transportation Amid Pandemics Practices and Policies is the first reference on pandemics especially COVID 19 in the context of transport logistics and supply chains. This book investigates the relationships between pandemics and transport and evaluates impacts of COVID 19 and effects of policy responses to address them. It explores how to recover from pandemics, reveals governance for immediate policy responses and future innovations, suggests strategies for post pandemic sustainable and resilient development, shares lessons of COVID 19 policymaking across countries and discusses how to transform transport systems for a better future. Transportation Amid Pandemics offers transport researchers and policymakers the scientific evidence they need to support their decisions and solutions against pandemics.

Curiosity and research brought me to discover an excellent handbook covering the relations between COVID 19 and the transport reality. It is called Transportation amid Pandemics: Lessons Learned from COVID 19 and has been published this year 2022. It happens to be the year of the 50th anniversary of the first report to The Club of Rome, The Limits to Growth. The new book covers evidences from all over the world and offers policy recommendations from a great variety of perspectives. Ernst Ulrich von Weizsäcker Represents the collective efforts of the World Conference on Transport Research Society (WCTRS). Uniquely deals with intertwined issues of pandemics and transport. Investigates both successful and problematic policy measures. Emphasizes evidence based policymaking from cross sectoral and transdisciplinary perspectives. Transfers lessons from the COVID 19 pandemic to future generations.
