**The Patchwork of World History in Texas High Schools** Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

(Re)Constructing Memory: Education, Identity, and Conflict Michelle J. Bellino, James H. Williams, 2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside and sometimes within school walls What kinds of curricular representations of conflict contribute to the construction of national identity and what kinds of encounters challenge presumed boundaries between us and them Through contemporary and historical case studies drawn from Cambodia Egypt Northern Ireland Peru and Rwanda among others this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity peace and stability and national citizenship In some contexts the erasure of conflict and the homogenization of

difference are central to shaping national identities and attitudes In other cases collective memory of conflict functions as a central organizing frame through which citizenship and national identity are re constructed with embedded messages about who belongs and how social belonging is achieved The essays in this volume illuminate varied and complex inter relationships between education conflict and national identity while accounting for ways in which policymakers teachers youth and community members replicate resist and transform conflict through everyday interactions in educational spaces

*The American Village in a Global Setting* Michael E. Connaughton, Suellen Rundquist, 2009-03-26 In October 2005 a conference honoring the contributions of Sinclair Lewis to Midwest and American culture and celebrating the friendship between Sinclair Lewis and Ida K Compton was held at St Cloud State University in St Cloud Minnesota Sinclair Lewis would no doubt have been flattered and perhaps a bit surprised by the breadth of this conference in his honor The fact that scholars writers students and readers gathered to discuss his work and its broader influence would have pleased him He would have learned that readers still found stimulus for serious thought in his writing and that his works can serve as a springboard to discussion of today s societal issues some of which might surprise him considerably The papers selected from the conference entitled *The American Village in a Global Setting* consider elements of Lewis world through today s lens In Part I his version of community is compared to that documented in other ways including architecture and television Scholars address issues such as anti Semitism theocratic communities the Irish and outdoor life In Part II the concept of community is expanded to the visions of other authors including his contemporaries such as Martha Ostenso Josephine Donovan and Willa Cather as well as more recent writers In Part III today s social and cultural issues in America are addressed expressing the global and interdisciplinary intent of the conference And last Part IV continues the global theme addressing international communities and pedagogical philosophies through film and literature

**The 'Other' Students** Dina C. Maramba, Rick Bonus, 2012-12-01 Though the Filipino American population has increased numerically in many areas of the United States especially since the influx of professional immigrants in the wake of the 1965 Immigration Act their impact on schools and related educational institutions has rarely been documented and examined *The Other Students* Filipino Americans Education and Power is the first book of its kind to focus specifically on Filipino Americans in education Through a collection of historical and contemporary perspectives we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice We highlight the argument that one cannot adequately and appropriately understand the complex histories cultures and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents their unique migration and immigration patterns their differing racialization and processes of identity formations the connections between diaspora and community belonging and the various perspectives offered by ethnic group centered analysis to multicultural projects The historical methodological and theoretical approaches in this anthology will be of interest to scholars researchers

**The Trouble with Textbooks** Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all
