Democracy Beyond the Nation State Joe Parker,2017-06-26 Explores egalitarian means of governing found in rural villages and urban neighborhoods indigenous communities workplaces social movement organizations and other everyday local and global settings beyond the nation state *Lifelines from Our Past* L. S. Stavrianos,2015-03-04 This book offers an extraordinary interpretation of world history from the paleolithic era to the present Renowned historian L S Stavrianos conceptualizes human history into three categories kinship societies tributary societies and capitalist societies In each he discerns and studies four life line issues ecology gender relations social relations and war that encompass the broadest areas of human experience The revised edition projects forward to the twenty first century offering the author s views on possible future scenarios involving the same lifeline issues *Disease, Resistance, and Lies* Dale T. Graden,2014-06-09 In the early nineteenth century the major economic players of the Atlantic trade lanes the United States Brazil and Cuba witnessed explosive commercial growth Commodities like cotton coffee and sugar contributed to the fantastic wealth of an elite few and the enslavement of many As a result of an increased population and concurrent economic expansion the United States widened its trade relationship with Cuba and Brazil importing half of Brazil s coffee exports and 82 percent of Cuba s total exports by 1877 *Disease Resistance and Lies* examines the impact of these burgeoning markets on the Atlantic slave trade between these countries from 1808 when the U S government outlawed American involvement in the slave trade to Cuba and Brazil to 1867 when slave traffic to Cuba ceased In his comparative study Dale Graden engages several important historiographic debates including the extent to which U S merchants and capital facilitated the slave trade to Brazil and Cuba the role of infectious disease in ending the trade to those countries and the effect of slave revolts in helping to bring the transatlantic slave trade to an end Graden situates the transatlantic slave trade within the expanding and rapidly changing international economy of the first half of the nineteenth century offering a fresh analysis of the Southern Triangle Trade that linked Cuba Brazil and Africa *Disease Resistance and Lies* challenges more conservative interpretations of the waning decades of the transatlantic slave trade by arguing that the threats of infectious disease and slave resistance both influenced policymakers to suppress slave traffic to Brazil and Cuba and also made American merchants increasingly unwilling to risk their capital in the transport of slaves **Assaulted Personhood** Craig C. Malbon,2020-12-14 In 21st century America personhood is under daily assault sometimes with dire consequences Scientist ethicist and ordained minister Craig C Malbon encourages the reader to consider such assaults on personhood endured by victims of abortion ageism Alzheimer s disease

drug addiction mental and physical disabilities gender gender orientation racism sexual preference identity politics and our will to power over the other In exploring personhood status Malbon poses difficult questions for us Is personhood assigned as all or nothing or is it a sliding scale based upon criteria arbitrarily aimed at our vulnerabilities Does the voiceless embryo and fetus have advocates who can speak to the moral question of abortion Is the personhood of an economically insecure pregnant woman degraded to the point where lack of access to early termination of pregnancy results in coercive childbearing Does being a member of the LGBTQI community target one for assaults on personhood to the extreme of being killed In delving into the biology and psychology of assaults of self upon the other Malbon sees powerful linkages of everyday assaults on personhood to darker profound original sins that are foundational to the rise of the American empire i e assaults on the indigenous Native Americans and assaults derivative to the institution of slavery upon Africans African Americans and their descendants

Power to the People Audrey Kurth Cronin,2019-10-01 Never have so many possessed the means to be so lethal The diffusion of modern technology robotics cyber weapons 3 D printing autonomous systems and artificial intelligence to ordinary people has given them access to weapons of mass violence previously monopolized by the state In recent years states have attempted to stem the flow of such weapons to individuals and non state groups but their efforts are failing As Audrey Kurth Cronin explains in Power to the People what we are seeing now is an exacerbation of an age old trend Over the centuries the most surprising developments in warfare have occurred because of advances in technologies combined with changes in who can use them Indeed accessible innovations in destructive force have long driven new patterns of political violence When Nobel invented dynamite and Kalashnikov designed the AK 47 each inadvertently spurred

terrorist and insurgent movements that killed millions and upended the international system That history illuminates our own situation in which emerging technologies are altering society and redistributing power The twenty first century sharing economy has already disrupted every institution including the armed forces New open technologies are transforming access to the means of violence Just as importantly higher order functions that previously had been exclusively under state military control mass mobilization force projection and systems integration are being harnessed by non state actors Cronin closes by focusing on how to respond so that we both preserve the benefits of emerging technologies yet reduce the risks Power in the form of lethal technology is flowing to the people but the same technologies that empower can imperil global security unless we act strategically

Scorched Earth Emmanuel Kreike,2021-01-12 A global history of environmental warfare and the case for why it should be a crime The environmental infrastructure that sustains human societies has been a target and instrument of war for centuries resulting in famine and disease displaced populations and the devastation of people s livelihoods and ways of life Scorched Earth traces the history of scorched earth military inundations and armies living off the land from the sixteenth to the twentieth century arguing that the resulting deliberate destruction of the environment environcide constitutes total war and is a crime against humanity and nature In this sweeping global history Emmanuel Kreike shows how religious war in Europe transformed Holland into a desolate swamp where hunger and the black death ruled He describes how Spanish conquistadores exploited the irrigation works and expansive agricultural terraces of the Aztecs and Incas triggering a humanitarian crisis of catastrophic proportions Kreike demonstrates how environmental warfare has continued unabated into the modern era His panoramic narrative takes readers from the Thirty Years War to the wars of France s Sun King and from the Dutch colonial wars in North America and Indonesia to the early twentieth century colonial conquest of southwestern Africa Shedding light on the premodern origins and the lasting consequences of total war Scorched Earth explains why ecocide and genocide are not separate phenomena and why international law must recognize environmental warfare as a violation of human rights

Beyond Secularism and Jihad? Peter D. Beaulieu,2012-07-13 Peter D Beaulieu examines the challenge posed by and to modernity and historic Islam as they encounter one another He compares the Western separation of Church and state with the unitary Islamic State and explores the proposed cultural and societal principles of the Second Vatican Council as potentially influencing long term events in both arenas Beaulieu s research is comprehensive and richly documented yet offers an accessible triangular inquiry into the mosque the manger and modernity By restoring a place at the table for Trinitarian Christianity alongside the engulfing monotheism of Islam and the alternative skepticism of Western rationalism this inquiry broadens the pallet of inter religious and intercultural contact points Beyond Secularism and Jihad provides balanced attention to the differences as well as the similarities between

Christianity Islam and modernity An emerging theme is natural law which is universal and intrinsic to all mankind and not confined to competing theologies Neglected in the West that it helped create natural law might contribute to the needed grammar for dialogue between the citizens in the West and the followers of Islam
