Teaching, Pedagogy, and Learning Jeffery W. Galle, Rebecca L. Harrison, 2017-05-01. Teaching Pedagogy and Learning: Fertile Ground for Campus and Community Innovations brings together narratives of pedagogical innovation aimed at increasing student engagement and performance and bolstering faculty teaching effectiveness and satisfaction. These transdisciplinary transpedagogical essays all emerged from faculty experiences at the annual Institute for Pedagogy in the Liberal Arts (IPLA) offered by Oxford College of Emory University. The book spotlights two significant points: first, faculty need pioneering supportive contexts within which they can conceive, develop, revise, and publish innovative teaching experiments using the same principles of experiential and active learning that have become the foundation of learning for student success; and second, strong institutional partnership with faculty development affords one way to achieve this outcome. The seven essays in this book are written by seventeen diverse scholar-teachers across eleven academic disciplines and nine institutions, from K-12 schools to small liberal arts colleges to tier-one research institutions, for whom the IPLA experience at Oxford Spring Boarded significant pedagogical growth.

Research in Education, 1974 **Resources in Education**, 1974 **Paradigms in Cartography** Pablo Iván Azócar Fernández, Manfred Ferdinand Buchroithner, 2013-08-04. In this book, the main trends, concepts, and directions in cartography and mapping in modernism and postmodernism are reviewed. Philosophical and epistemological issues are analysed in cartography from positivist, empiricist, neo-positivist, and post-structuralist stances. In general, in cartography, technological aspects have been considered as well as theoretical issues. The aim is to highlight the epistemological and philosophical viewpoint during the development of the discipline. Some main philosophers who have been influential for contemporary thinking, such as Immanuel Kant, Ludwig Wittgenstein, Karl Popper, and Bertrand Russell, are considered. None of these philosophers wrote about cartography directly, excepting Kant, but their philosophies are related to cartography and mapping issues. The book also analyses the concept of paradigm or paradigm shift, coined by Thomas Kuhn, who applied it to the history of science. Different cartographic trends that have arisen since the second half of the twentieth century are analysed according to this important concept, which is implicit inside the scientific or disciplinary communities. Further, the

authors analyse the position of cartography in the context of the sciences and other disciplines adopting a positivistic point of view. Additionally, they review current trends in cartography and mapping in the context of information and communication technologies in a post-modernistic or post-structuralistic framework. Thus, since the 1980s and 1990s, new mapping concepts have arisen which challenge the discipline's traditional map conceptions.
