

Unit 5: Revolutions Study Guide

C. 1750 - 1900

Topic 5.1 The Enlightenment

Learning Objective Explain the intellectual and ideological context in which revolutions swept the Atlantic world from 1750 to 1900.	Historical Developments Enlightenment philosophies applied new ways of understanding and empiricist approaches to both the natural world and human relationships; they also re-examined the role that religion played in public life and emphasized the importance of reason. Philosophers developed new political ideas about the individual, natural rights, and the social contract. The rise and diffusion of Enlightenment thought that questioned established traditions in all areas of life often preceded revolutions and rebellions against existing governments. Nationalism also became a major force shaping the historical development of states and empires.	1. Explain the ideas of the Enlightenment. Human reasoning can discover truths about the world, politics, and religion to improve the lives of humankind. They rejected old beliefs and used logic to develop new ideas like fairness in sentencing criminals. 2. How were these ideas considered changes from previous philosophies/mindsets? When philosophers identified a principle to reject, they replaces it by asking questions that were important to finding evidence and the application of reason and logic. 3. What factors facilitated the spread of Enlightenment ideals within and outside of Europe? Printing press, salons, encyclopedia, newspapers, pamphlets, and political music. 4. Explain natural rights. Rights that are not dependent on the laws, customs, or beliefs of any culture or government, they are inalienable and universal. 5. Explain the social contract. An idea that all individuals surrender personal freedoms to a government or association, but that the government must rule with certain responsibilities. 6. Explain nationalism and how it will later play an important role in the political revolutions of the 18th and 19th centuries. Nationalism is a feeling of intense loyalty to others who share one's language and culture. The ideas that people who share a culture should live in an independent nation-state threatened to destroy all of Europe's multiethnic empires.
Learning Objective Explain how the Enlightenment affected societies over time.	Historical Developments Enlightenment ideas and religious ideals influenced various reform movements. These reform movements contributed to the expansion of rights, as seen in	7. How did the Enlightenment lead to social changes during the 1750-1900 time period? It influences reform movements that contributed to the expansion of rights in expanded suffrage, the abolition of slavery, and the end of serfdom. 8. Explain the origins of feminism in this time period.

Zvacek, 2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field AP® World History Jay P.
