Online Worlds: Convergence of the Real and the Virtual William Sims Bainbridge,2009-12-08 William Sims Bainbridge Virtual worlds are persistent online computer generated environments where people can interact whether for work or play in a manner comparable to the real world The most prominent current example is World of Warcraft Corneliussen and Rettberg 2008 a massively multiplayer online game with 11 million's subscribers Some other virtual worlds notably Second Life Rymaszewski et al 2007 are not games at all but Internet based collaboration contexts in which people

can create virtual objects simulated architecture and working groups Although interest in virtual worlds has been growing for at least a dozen years only today it is possible to bring together an international team of highly accomplished authors to examine them with both care and excitement employing a range of theories and methodologies to discover the principles that are making virtual worlds increasingly popular and may in future establish them as a major sector of human centered computing
