

Laboratory: Human Population Growth

Mrs. Côté

Answer Key

Enviro. Science 120

Pre Lab Work:

Before beginning this laboratory, answer the following questions on your own piece of paper in your notebook:

- Define the following terms:
 - growth rate – describes how fast a population is increasing or decreasing and is dependent upon the birth rate and death rate
 - birthrate – is the number of infants born in a given year/1000 people in the population
 - death rate – is the number of people who die in a given year/1000 individuals in the population
 - zero population growth – when the population is in equilibrium or the number of births and deaths are equal
 - developed country – countries that highly developed economy and advanced technology
 - developing country – countries that are considered to have low standard of living, and undeveloped industrially
 - demographic transition – refers to the transition from high birth and death rates to low birth and death rates
- What is a population explosion? How quickly is our population growing each year? What about each day?
A population explosion is when a population lacks limited resources so is able to grow out of control. The human population is grows about 80 million a year and 219, 178 each day.
- How is the growth rate of the human population calculated?
 $\text{Growth rate} = \text{birth rate} - \text{death rate}$
- What causes a negative population growth? What causes a positive population growth?
Negative population growth occurs when the birth rate is less than the death rate
Positive population growth occurs when the birth rate exceeds the death rate
- Why do the two graphs appear to have a different shape?
The population growth rate was much slower in the earlier years. The J-curve shows exponential population growth and the graphs are not drawn to the same scale.
- Using a piece of paper, create the following charts:

Country	Birthrate (%)	Death rate (%)	Population Growth 2005	Population Growth 2050	Demographic Transition	Relative Place in Transition	Sketch graph showing Blue & Pink Line
USA	2.06	0.51	0.92	-0.06	1.55	5

Integrated Science for Sustainable Development Goal 3 Nima Rezaei, 2024-12-11 This contributed volume offers an interdisciplinary view on several topics related to the Sustainable Development Goal 3 SDG 3. These targets mainly involve reducing maternal mortality, ending preventable deaths under five years of age, fighting communicable diseases e.g. tuberculosis, HIV, malaria, hepatitis B, and neglected tropical diseases, reducing mortality from non-communicable diseases e.g. cardiovascular disease, cancer, diabetes, chronic respiratory disease, and suicide, and promoting mental health, prevention and treatment of substance abuse, reducing road injuries and deaths, universal access to sexual and reproductive care, family planning and education, achieving universal health coverage, reducing illnesses and deaths from hazardous chemicals and pollution, implementation of the WHO Framework Convention on Tobacco Control, supporting research, development and universal access to affordable vaccines and medicines, increasing health financing and supporting health workforce in developing countries, improving early warning systems for global health risks. *Cumulated Index Medicus*, 1974

Artificial Intelligence Research and Development A. Cortés, F. Grimaldo, Tommaso Flaminio, T. Flaminio, 2022-11-03 Artificial intelligence has become an integral part of all our lives. Development is rapid in this exciting and far-reaching field, and keeping up to date with the latest research and innovation is crucial to all those working with the technology. This book presents the proceedings of the 24th edition of CCIA, the International Conference of the Catalan Association for Artificial Intelligence, held in Sitges, Spain, from 19-21 October 2022. This annual event serves as a meeting point not only for researchers in AI from the Catalan-speaking territories, southern France, Catalonia, Valencia, the Balearic Islands, and Alghero in Italy, but for researchers from around the world. The programme committee received 59 submissions from which the 26 long papers and 23 short papers selected for presentation at the conference by the 62 experts who make up the committee are included here. The book is divided into the following sections: combinatorial problem solving and logics for artificial intelligence, sentiment analysis and text analysis, data science, recommender systems and decision support systems, machine learning, computer vision, and explainability and argumentation. This book also includes an abstract of the invited talk given by Prof. Fosca Giannotti. Providing a comprehensive overview of research and development, this book will be of interest to all those working in the field of Artificial Intelligence. **Mathematics Research for the Beginning Student, Volume 1** Eli E. Goldwyn, Sandy Ganzell, Aaron Wootton, 2022-11-24 Mathematics research opportunities for undergraduate students have grown significantly in recent years, but accessible research topics for first and second year students with minimal experience beyond high school mathematics are still hard to find. To address this need, this volume provides beginning students with specific research projects and the tools required to tackle them. Most of these projects are accessible to students who have not yet taken Calculus, but students who know some Calculus will find plenty to do here as well. Chapters are self-contained, presenting projects students can pursue along with essential background material and suggestions for further reading.

Suggested prerequisites are noted at the beginning of each chapter. Some topics covered include games on graphs, modeling of biological systems, mosaics, and virtual knots. Mathematics for sustainable humanity, mathematical epidemiology, Mathematics Research for the Beginning Student, Volume 1, will appeal to undergraduate students at two and four year colleges who are interested in pursuing mathematics research projects. Faculty members interested in serving as advisors to these students will find ideas and guidance as well. This volume will also be of interest to advanced high school students interested in exploring mathematics research for the first time. A separate volume with research projects for students who have already studied calculus is also available.
