The Memory Hole Fritz Fischer,2013-12-01 The U S history curriculum is under attack Politicians political analysts and ideologues seek to wipe clean the slate of the American past and replace it with one of their own invention The basis for this new narrative comes from political beliefs of the present rather than any systematic examination of the past These anti historians campaign to insert their version of American history into the nation s classrooms hoping to begin a process that will forever transform our understanding of America s past The Memory Hole examines five central topics in the US history curriculum showing how anti historians of both the left and right seek to distort these topics and insert a refashioned story in America s classrooms Ignoring facts refashioning other facts and pretending that there are no rules in the telling of history these re interpreters of the past place the minds of America s young people in danger The beleaguered hero of this book is the discipline of History and The Memory Hole shows how the history curriculum should adhere to history s habits of mind that require complex sophisticated and subtle thinking about the past History and social studies teachers students of history and all those who care about the deep and enduring value of history will value this book and its conclusions

Ancient Wisdom with a Modern World View Robert D. Harter, PhD,2015-07-12 With trepidation Dr Robert D Harter approached the subject of Earth origins and human development from the position of a lifelong Christian who is also a scientist He grew up in a rural Ohio Christian family and thoroughly understands the position of those who believe the Earth and everything in it was created a few thousand years ago At the same time he is a university professor who understands the basis upon which the Earth is claimed to be millions of years old Both positions cannot be correct and it is probable that neither is completely wrong Using a scientist's analytical approach Dr Harter evaluated and compared biblical anthropological and geological records In Scripture Versus Science he proposes a resolution to the increasingly heated argument about evolution While unlikely to provide a clear and definitive answer this book begins to thin the fog that has developed around it He states There has been a lot of fog associated with whether God created the universe and everything in it or whether it just happened by chance In writing this book I attempt to show that the ideas supporting the two views are not necessarily mutually exclusive In other words I hope I have allowed a bit of sun to shine through the fog *Introduction to Social Work* Lisa E. II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within

Les réalités de la 'réalité' - deuxième partie: Vers une compréhension des facteurs responsables des progrès de la science moderne (Volume 2) Fritz Dufour, MBA' DÉSS, 2019-03-23 La différence entre la première partie et la deuxième partie volumes 1 et 2 de cette série est que dans la première partie l'auteur a montré comment ce que nous appelons la réalité commence avec le moi intérieur alors que la deuxième partie décrit ce qui en réalité affecte et modifie l'environnement ou la réalité et quels sont les facteurs derrière cette dynamique Ce qui impacte et modifie l'environnement c'est la science Ce volume 2 commence par montrer comment la technologie joue un rôle important dans les progrès scientifiques Bien que la relation entre les deux soit symbiotique la science peut exister sans technologie mais la technologie a désormais besoin de la science La technologie militaire est un exemple de la manière dont la technologie peut faire progresser la science Certaines inventions militaires finissent par avoir un usage civil La science tant au centre de la société le livre plaide en faveur de l'impact direct de sciences sociales telles que la politique et l'économie sur le progrès de la science La politique dit l'auteur influence la science en raison de l'incertitude de la science et l'économie le fait grâce à la disponibilité de fonds pour

les chercheurs et les scientifiques D autre part le gouvernement influence galement le progr s scientifique par le biais de r glementations Le livre donne comme exemple la r gulation du cyberspace En outre en montrant comment l art influence la science l auteur plaide en faveur de l aspect polyfactoriel du progr s scientifique Dans cette optique il prouve galement que des facteurs tels que le scepticisme la curiosit et la qu te du savoir influencent grandement le progr s de la science Cela dit l auteur est un virage 90 degr s En terminant la partie deux de cette fa on je voulais d une mani re ou d une autre la relier la premi re partie qui affirme que la r alit commence de l int rieur
