By contrast, the Shoshone Indians of the western U.S. Great Basin area traditionally explained the phases of the moon by describing it as shaped like a bowl or basket rather than a sphere. The phase of the moon was thought to be simply a matter of which side of the moon was facing the observer: A crescent moon was a side view and a full moon was the outside convex bottom. By learning the distinctive culture of their own society, children use this knowledge to anticipate the behavior of those around them and interpret the meanings of those behaviors. In this sense, a culture can be thought of as a system of understandings that describe how members of a society customarily behave and make sense of the world around them. Much as a map helps a traveler negotiate a terrain, a culture helps people negotiate the flow of interactions with other members of their society that punctuate daily life.

atoning for its treatment of native Hawai ian islanders apologizing for history has become a standard feature of the  
international political scene As Alexis Dudden makes clear interrogating this process is crucial to understanding the value of  
the political apology to the state When governments apologize for past crimes they take away the substance of apology that  
victims originally wanted for themselves They rob victims of the dignity they seek while affording the state a new means with  
which to legitimize itself Examining the interplay between political apology and apologetic history Dudden focuses on the  
problematic relationship binding Japanese imperialism South Korean state building and American power in Asia She  
examines this history through diplomatic cultural and social considerations in the postwar era and argues that the process of

*Kant's Embedded Cosmopolitanism* Georg Cavallar, 2015-05-19 Kant's omnipresence in contemporary cosmopolitan discourses contrasts with the fact that little is known about the historical origins and the systematic status of his cosmopolitan theory This study argues that Kant's cosmopolitanism should be understood as embedded and dynamic Inspired by Rousseau Kant developed a form of cosmopolitanism rooted in a modified form of republican patriotism In contrast to static forms of cosmopolitanism Kant conceived the tensions between embedded local attachments and cosmopolitan obligations in dynamic terms He posited duties to develop a cosmopolitan disposition *Gesinnung* to establish common laws or cosmopolitan institutions and to found and promote legal moral and religious communities which reform themselves in a way that they can pass the test of cosmopolitan universality This is the cornerstone of Kant's cosmopolitanism and the key concept is the vocation *Bestimmung* of the individual as well as of the human species Since realizing or at least approaching this vocation is a long term arduous and slow process Kant turns to the pedagogical implications of this cosmopolitan project and spells them out in his later writings This book uncovers Kant's hidden theory of cosmopolitan education within the framework of his overall practical philosophy

**South Africa in World History** Iris Berger, 2009-03-27 This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa Stone Age foragers farmers with iron technology and pastoralists all interacted to create a complex society before Europeans arrived In the seventeenth century Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa British conquest in the early nineteenth century brought an end to slavery as well as new forms of colonial domination tension between the British and the original Dutch settlers armed struggle between expanding European communities and Africans including the highly militarized Zulu kingdom and intensive missionary activity that transformed many African societies The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor new clashes between British and Afrikaners the final conquest of African societies and new European migrants During the twentieth century despite further economic development African communities were increasingly impoverished New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African and

African nationalists The intensification of resistance in the 1970s and 80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid's economic and political legacy by building a new nonracial society The book emphasizes social and cultural history focusing on people's interactions and identities according to race class gender religion and ethnicity It also addresses changes in literature both oral and written music and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes While this emphasis reflects dominant trends in historical scholarship for the past two decades it also includes recent material on environmental history and relationships between African Americans and South Africans Where relevant it highlights comparisons between South African and U S history
