World Migration Report 2008:

India Migration Report 2010 S Irudaya Rajan, 2020-11-29 The first India Migration Report proposed by the Research Unit on International Migration set up by the Ministry of Overseas Indian Affairs Government of India at the Centre for Development Studies Thiruvananthapuram Kerala is organised into articles on four broad themes migration remittances gender and policy issues The opening article reviews the historical trends in international migration followed by two articles that deal with workers remittances and one which discusses the maturity that Kerala emigration reached in this state Other articles focus on cross border migration in developing countries and as yet less documented gender issues including the migration of nurses and housemaids Though large numbers of unskilled and semi skilled labourers migrate to the Gulf region the prevailing labour laws and the violation of human rights in the GCC countries are an unexplored area this is something this volume also addresses The cost of migration and the role played by unscrupulous recruitments agents are serious concerns for both the government and international agencies working in migration The Emigration Act 1983 provides guidelines for organising recruitment business in India Do we have to revamp the recruitment system These are some of the themes this book discusses

World Development Report 2013 World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries

depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success *India Migration Report 2011* S. Irudaya Rajan,2012-06-25 This book examines identities violence and conflict in the context of internal migration within India As India prepares to count its citizens for Census 2011 with a proposal for a National Population Register and a unique identity card for every Indian citizen the debate on internal and cross border migration is significant The second volume in this annual series India Migration Report 2011 focuses on the implications of internal migration livelihood strategies recruitment processes and development and policy concerns in critically reviewing the existing institutional framework The essays provide a district level analysis of the various facets of migration with a focus on employment networks gender dimensions and migration development linkages with concrete policy suggestions to improve living and working conditions of vulnerable migrant workers who are a lifeline to the growth of Indian economy This will be an invaluable resource for those in the fields of demography economics sociology public policy and administration World Migration Report ,2010 *The International Organization for Migration* Martin Geiger,Antoine Pécoud,2020-02-18 In 2016 the International Organization for Migration IOM became part of the United Nations With 173 member states and more than 400 field offices the IOM the new UN migration agency plays a key role in migration governance The contributors in this volume provide an in depth and comprehensive insight into the IOM its transformation current structure and projects as well as its capacity self understanding and political agenda **Handbook of Migration and Globalisation** Anna Triandafyllidou,2018-02-23 This Handbook explores the multifaceted linkages between two of the most important socioeconomic phenomena of our time globalisation and migration Both are on the rise increasing in size and scope worldwide and this Handbook offers the necessary background knowledge and tools to understand how population flows shape and are shaped by economic and cultural globalisation World of Walls Said Saddiki,2017-10-09 We re going to build a wall Borders have been drawn since the beginning of time but in recent years artificial barriers have become increasingly significant to the political conversation across the world Donald Trump was elected President of the United States while promising to build a wall on the Mexico border and in Europe the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers Virtual walls are also built and crushed at increasing speed In the post 9 11 era there is a greater danger from so called transnational non state actors and computer hacking and cyberterrorism threaten to overwhelm our technological barriers In this timely and original book Said Saddiki scrutinises the physical and virtual walls located in four continents including Israel India the southern EU border Morocco and the proposed border wall between Mexico and the US Saddiki s detailed analysis explores the tensions between

the rise of globalisation which some have argued will lead to a borderless world and the end of the nation state and the rapid development in recent decades of border control systems Saddiki examines both regular and irregular cross border activities including the flow of people goods ideas drugs weapons capital and information and explores the disparities that are reflected by barriers to such activities He considers the consequences of the construction of physical and virtual walls including their impact on international relations and the rise of the multi billion dollar security market World of Walls The Structure Roles and Effectiveness of Separation Barriers is important reading for all those interested in the topics of immigration border security international relations and policy

A Tight Embrace Marco Zoppi,2020-12-16 This book provides various examples showing how Europe and Africa can be conceptualized and researched as a single macro area connected by interrelated global and multilevel dynamics What types of relations characterize Europe and Africa today The nature of the connections is neither clear nor unilinear rather they appear dialectical multifaceted and pointing in different directions This edited book explores narratives contemporary dynamics and historical legacies demonstrating the long standing relations between the continents suggesting that the entangled Euro African relations in multiple fields should be intended as a permanent condition for any analyses The authors provide various evidence of the fact that the two continents are deeply part of shared but uneven structures of global wealth and power Within those structures certain dynamics are constantly produced and reproduced yet new opportunities to subvert existing relations have also emerged recently Hence instead of proposing conceptual premises holding Africa and Europe as separate regions that get in touch at specific moments in time be it colonialism the Cold War globalization migration this book critically considers that each of the matters explored is anything but an episode in a more complex intertwined story that ultimately represents the explanatory framework for present Euro African relations

Territoriality and Migration in the E.U. Neighbourhood Margaret Walton-Roberts,Jenna Hennebry,2013-08-16 This volume brings together an interdisciplinary group of scholars around an important question how has migration changed in Europe as the European Union has enlarged and what are the consequences for countries and for migrants themselves inside and outside of these redrawn jurisdictional and territorial borders By addressing this question the book contributes to three current debates with respect to EU migration management 1 that recent developments in EU migration management represent a profound spatial and organizational reconfiguration of the regional governance of migration 2 the trend towards the externalization or subcontracting of migration control and 3 how the implications of Europe s changing immigration policy are increasingly felt across the European neighborhood and beyond Based on new empirical research the authors in this collection explore these three processes and their consequences for both member and non member EU states for migrants themselves and for migration systems in the region The collection indicates that despite the rhetoric of social and spatial integration across the

EU region as one wall has come down new walls have gone up as novel migration and security policy frameworks have been erected making European immigration more complex and potentially more influential beyond the EU zone than ever
