Henry Martin, 2005. *Counterpoint* is a textbook for use as a stand alone text in a course on species counterpoint or as a supplementary text for standard college level courses in music theory. It is based on Heinrich Schenker's 1868-1935 two volume study of counterpoint. It is intended to help all students of theory or composition to improve their musicianship by examining the voice leading that underlies Western tonal music. The book proceeds by developing species counterpoint in the tradition of Johann Joseph Fux and his famous *Gradus ad Parnassum* 1725 but with attention to Schenker's more in depth study. For the sake of brevity musical examples are available on the Scarecrow Press website www.scarecrowpress.com rather than within the text itself. Everyone from beginning music theory students to composers to graduate composition students will greatly benefit from the methods presented here. Rather than actually teaching a student to compose working through these exercises will improve musicianship as it applies to both composition and understanding music theory.
