The book is divided into three parts: the first of which provides an overview of recent trends in social media and user generated content; clarifies concepts that are often used in an overlapping way and examines the digitization of word of mouth via online networks. The second part analyzes the impacts that social media can have on traveler behavior for each step in the travel process and also on suppliers highlighting opportunities, threats and strategies. In the third part of the book future potential trends deriving from the mobile marketing technologies are explored and possible methods for social monitoring by means of key performance indicators are examined. It is considered how engaging customers and prospects by means of social media might increase customer loyalty, foster electronic word of mouth communication and consequently have important effects on corporate sales and revenues. **Tourism in the City** Nicola Bellini, Cecilia Pasquinelli, 2016-08-29 This book critically explores the interconnections between tourism and the contemporary city from a policy oriented standpoint combining tourism perspectives with discussion of urban models, issues and challenges. Research based analyses addressing managerial issues and evaluating policy implications are described and a comprehensive set of case studies is presented to demonstrate practices and policies in various urban contexts. A key message is that tourism policies should be conceived as integrated urban policies that promote tourism performance as a means of fostering urban quality and the well being of local communities e.g. in terms of quality spaces, employment, accessibility, innovation and learning opportunities. In addition to highlighting the significance of urban tourism in relation to key urban challenges, the book reflects on the risks and tensions associated with its development including the rise of anti tourism movements as a reaction to touristification, cultural commodification and gentrification. Attention is drawn to asymmetries in the costs and benefits of the city tourism phenomenon and the supposedly unavoidable trade off between the interests of residents and tourists is critically questioned.
