Eye Of The Hurricane Richard Bellman, 1984-06-01 This is a very frank and detailed account by a leading and very active mathematician of the past decades whose contributions have had an important impact in those fields where mathematics is now an integral part It starts from his early childhood just after the First World War to his present day positions as professor of mathematics electrical engineering and medicine at the USC which in itself reflects on the diversity of interests and experiences gained through the turbulent years when American mathematics and sciences

established themselves on the forefront The story traces the tortuous path Bellman followed from Brooklyn College the University of Wisconsin to Princeton during the war years more than a decade with the RAND Corporation with frequent views of more than just the academic circles including his experiences at Los Alamos on the A bomb project Bellman gives highly personalised views of key personalities in mathematics physics and other areas and his motivations and the forces that helped shape dynamic programming and other new areas which emerged as consequences of fruitful applications of mathematics

Consciousness Harry Knox, 2023-02-22 In the arena of psychology no branch is more bizarrely named than NLP neuro linguistic programming It doesn't trip off the tongue and the meaning is how shall we say opaque One definition of NLP is that it's the study of excellence Another is that it's an approach to communication and personal development Another is that it's about how people organize their thinking and language and how this affects behavior NLP doesn't seem to have a clear cut definition and is often branded a pseudoscience It still hasn't achieved mainstream recognition in psychology A significant difficulty lies in the term itself What on earth does neuro linguistic programming mean It seems like something extremely technical difficult and scientific rather than a practical means of helping people to lead better and more effective lives as its proponents claim Amazingly the term neuro linguistic programming is ideal for something that seems drastically different from NLP but is the exact reason why NLP works Neuro linguistic programming is in fact the perfect way to describe the most baffling phenomenon of all consciousness It should become the standard way of referring to consciousness It involves all the key ingredients 1 the nervous system neuro 2 language linguistics and 3 programming how we program our neural network with language to allow us to use consciousness a new acquired cultural operating system to override programmed instincts the old biological operating system Humans aren't born conscious They become conscious as they learn language Human thought is not conducted biologically it is conducted via language something we were not born with and hence cannot by definition be part of our biology Consciousness is a humanly acquired new operating system a cultural not biological operating system It has nothing at all to do with Darwinism with selfish genes with random genetic mutations with the laws of atoms Consciousness gives us an initial level of programming and there's then nothing to stop us improving our consciousness expanding our consciousness refining our consciousness altering our consciousness all in the name of ultimately optimizing our consciousness so that we can lead the best lives of which we are capable It wasn't Darwinism that brought about a phase change in human evolution It was language Come inside and find out all about it
