should be noted that the quality in research articles comes from the extensive planning and in depth research before starting writing them actually This is true even for management research papers writing A research paper analyzes a perspective or argues a point Regardless of the type of research paper the researcher is writing the researcher should present his own thinking backed up by others ideas and information Research paper as a result of the research in the teaching of writing discussions with colleagues and own experiences we have developed a detailed approach to writing research papers and the approach is presented here Instead of focusing on one research paper we have focused on the process of research writing through a series of shorter writing exercises Students begin by having to carefully think about a topic of research and by developing a working idea They then write a series of shorter essays that explore that topic All along the way students are continuing to research and revise their working proposal so that by the end of the term their thinking about their original topic of research has evolved This b *Guide to Writing Empirical Papers, Theses, and Dissertations* G. Hasan,2013-01-22 Seminar paper from the year 2011 in the subject Business economics Offline Marketing and Online Marketing grade Distinction University of Lincoln course title language English abstract It is an immensely complex exercise to measure the quality of a service There are differences between product and service In case of product there are precise specifications such as length depth width weight color etc On the other hand a service can have several intangible or qualitative features In addition there are some expectations of the consumer regarding the service which can differ significantly based on a range of factors such as experience personal requirements and what other people may have said to

them To determine the service quality Parasuraman Zeithaml and Berry 1994 have developed a methodology known as SERVQUAL which is a service quality questionnaire survey methodology SERVQUAL model suggested five dimensions of service quality They are reliability responsiveness tangibles empathy and assurance Experiences or perceptions and expectation are measured in SERVQUAL model and SERVQUAL model has been well used in retail surroundings Berry 1986 Brown et al 1993 Carmen 1990 Finn and Lamb 1991 Dabholkar et al 1996 including banking fast food dry cleaning Cronin and Taylor 1992 and health care Babakus and Mangold 1989 In diversified businesses as the technologically advanced industrial market Pitt et al 1992 and B2B business to business services Bressinger and Lambert 1990 include the application of the SERVQUAL However this model raises some doubts as to whether expectations are being assessed at all The gap measured by the SERVQUAL model between expectation and perception is uncertain as to whether this is an indication of initial expectation or how the service is continuously reevaluated whilst it is being executed or experienced Therefore SERVPERF model is proposed by Cronin and Taylor 1992 and this model eliminates expectation from the SERVQUAL and it measures the service quality based on service perception In this paper the SERVPERF model is used to measure the service quality of the sports centre
