Rajibul Hasan, 2013-01-22 Seminar paper from the year 2011 in the subject Business economics Offline Marketing and Online Marketing grade Distinction University of Lincoln course title language English abstract It is an immensely complex exercise to measure the quality of a service There are differences between product and service In case of product there are precise specifications such as length depth width weight color etc On the other hand a service can have several intangible or qualitative features In addition there are some expectations of the consumer regarding the service which can differ significantly based on a range of factors such as experience personal requirements and what other people may have said to them To determine the service quality Parasuraman Zeithaml and Berry 1994 have developed a methodology known as SERVQUAL which is a service quality questionnaire survey methodology SERVQUAL model suggested five dimensions of service quality They are reliability responsiveness tangibles empathy and assurance Experiences or perceptions and expectation are measured in SERVQUAL model and SERVQUAL model has been well used in retail surroundings Berry 1986 Brown et al 1993 Carmen 1990 Finn and Lamb 1991 Dabholkar et al 1996 including banking fast food dry cleaning Cronin and Taylor 1992 and health care Babakus and Mangold 1989 In diversified businesses as the technologically advanced industrial market Pitt et al 1992 and B2B business to business services Brensinger and Lambert 1990 include the application of the SERVQUAL However this model raises some doubts as to whether expectations are being assessed at all The gap measured by the SERVQUAL model between expectation and perception is uncertain as to whether

this is an indication of initial expectation or how the service is continuously reevaluated whilst it is being executed or experienced Therefore SERVPERF model is proposed by Cronin and Taylor 1992 and this model eliminates expectation from the SERVQUAL and it measures the service quality based on service perception In this paper the SERVPERF model is used to measure the service quality of the sports centre Measuring Of Services Quality Initiatives Undertaken By Eye Hospitals In Kolkata Bhaskar Mukherjee, *Libraries Act on Their LibQUAL+ Findings* Fred M. Heath,Martha Kyrillidou,Consuella Askew,2014-04-23 Learn how other libraries are using LibQUAL data to improve their services and programs This book focuses on the value of the 2002 LibQUAL survey data to help librarians provide better services for users This unique work highlights the continued efforts of participating libraries that used this Web based marketing instrument to assess and evaluate their service quality resource allocations staffing technology and policies Library professionals dealing with interested inlibrary service quality assessment will benefit from the practical examples and graphical representations found in this vital book With *Libraries Act on Their LibQUAL Findings* you will gain a better understanding of how to use your LibQUAL data to identify opportunities to improve your services and programs initiate further data exploration and identify those areas of your library which need change In times of budget reductions the information in this book will show you how to better demonstrate to your patrons community and government agencies the value of the investment in library staff and resources Enhanced with charts graphs tables and figures this text will help your library smoothly evolve with your patrons expectations and needs *Libraries Act on Their LibQUAL Findings From Data to Action* covers several important topics including the LibQUAL survey instrumentwhat it is and how it works library service quality and user perceptions of library service quality peer comparisons and benchmarking qualitative and quantitative data analysishow to read your findings strategic planninghow to use your findings This resource is of national importance presenting varying perspectives from different library contexts such as library consortia library types and individual library case studies The book also provides ideas for using LibQUAL to develop better library services for diverse usersfaculty as opposed to students or the general public rather than specialists From identifying and reaching patrons for conducting the LibQUAL survey to identifying gaps between desired perceived and minimum expectations of services this book will guide you in continuously meeting the needs of your community **Service Quality Measurement: Issues and Perspectives** Lewlyn L. R. Rodrigues,2013-05-22 This book is very useful for it is not just descriptive in its nature but prescriptive too It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation and prescriptive as it clearly prescribes how a beginner can put the theory into practice In this globalized economy maintaining quality of products and services has been the thrust area of interest among academicians and practitioners Today there are quite a good number of books and research articles available Nevertheless service quality measurement has always posed problems particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers The research

literature is filled with articles on how to quantify the services and there are several streams of arguments on the choice of the most ideal approach. However, the research gap lies in the answer to the question: Do these measurement instruments concur in their measurement outcomes or do they give different results in the same situation? This book primarily makes an attempt to answer this question through a case study approach. Even though there are several instruments for the measurement of service quality, the two most widely used instruments are SERVQUAL and SERVPERF metrics. Comprehensively, this book explains the systematic procedure of using both the instruments in a service sector and further the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector. It then takes the reader through a series of tests in order to compare the two metrics and to prove statistically if there is the same outcome in a problem situation. The results are sure to surprise the reader and trigger the research bent of mind to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional guide.

Algerian Islamic Banks Elkhansa Medjedel, Abu Bakar A Hamid, Noor Inayah Yaakub, 2020-10-06. Due to the fierce competitive environment in the banking industry, several service providers implement marketing tactics to compete in order to achieve customer loyalty. Particularly, Islamic banks around the world are struggled to compete against conventional banks in terms of marketing activities development and gaining customer loyalty. Relationship marketing tactics such as price, service quality, communication, customization, and reputation considered as the tools that marketers can use to enhance trust and commitment and subsequently customer loyalty. This study investigates the impact of relationship marketing tactics, trust, and commitment on

customer loyalty in Algerian Islamic banks Data were collected through self administered questionnaires delivered to 308 customers of two leading Islamic banks in Algeria Data were analyzed using Structural Equation Modeling through Smart PLS The results found that only communication and customization are related to trust and reputation positively related to commitment Communication and service quality significantly predicted customer loyalty In addition the results provided a substantial support that trust and commitment acts partially as the mediators on the relationship between relationship marketing tactics and customer loyalty Findings also have contributed to new knowledge of evaluating a model of relationship marketing tactics with the role of trust and commitment on loyalty Finally it would be useful to examine more variables future research can include different tactics such as reciprocity tangible rewards direct contact value proposition and customer satisfaction as well
