Abstract. Face to the questions in the traditional video monitoring system, this paper proposed the intelligent video surveillance system based on the 3G technology, developed by the embedded system. The system can realize the information transmitted through the 3G network. And the system has the function of remote real-time audio monitoring, remote viewing and download the video data acquisition, and message security alarm.

Introduction

As the people's security consciousness gradually improved, more and more places start using video monitoring system, video surveillance as the most effective means in security system, is used in all areas of our life. Video surveillance system is from the first generation analog control system, to develop part of digital system of the second generation, now it evolves to the present fully digital system of third generation. In the course of evolution, while greatly improving the system structure and system equipment, some factors cannot change due to being restricted. For example, it is more dependents on the manual to interpret the content of video in the traditional video surveillance system. This leads a lot of manpower used, material resource is wasted. At the same time, many limitations in the traditional wired real-time video monitoring system of cable transmission, such as wiring maintenance difficult, tedious, complicated and other shortcomings, makes cable real time monitoring system has been greatly restricted^[1]. As the large-scale construction and commercially available of 3G networks in our country, the video monitoring gradually get rid of the limit of time and space, realize long distance and real-time video transmission. Video signal transmission quality has greatly improved since supporting the 2Mbps high bandwidth, makes it is possible at any time, anywhere, on-demand video monitoring.

3G Technology Overview

The 3G technology has the following characteristics: ① high speed data transmission rate. The most obvious difference is that 3G can provide a faster data transfer rate compared with 2G, so that the "broadband" movement, which makes mobile information business based on the wireless broadband come into reality. ② it supports the seamless link of network. The third generation mobile communication system will be a system of global coverage and used, a global standard, so that any time, any place, any communication between people become possible, and can be used with a mobile phone to realize global roaming. ③ The high spectrum efficiency, high quality, low cost, high security features.

Overview of intelligent video surveillance

Intelligent video surveillance is a new application direction in the field of computer vision in recent years. It is based on the digital, networked and intelligent, detects, locates, tracks and recognizes the moving target by video analysis algorithms for dynamic scenes in the moving target, then analyzes the behavior and interaction relationship. Field situation is evaluated according to set rules to, and alarm is made to abnormal events, monitor scene artificial analysis is changed to automatic analysis, a lot of

Research and Advanced Technology for Digital Libraries Traugott Koch, Ingeborg T. Solvberg, 2004-02-26 Welcome to ECDL 2003 and to these conference proceedings featuring all the papers presented at the 7th European Conference on Research and Advanced Technology for Digital Libraries. Following Pisa 1997, Heraklion 1998, Paris 1999, Lisbon 2000, Dordrecht 2001 and Rome 2002, ECDL 2003 in Trondheim reaches some of the northernmost shores of the continent. Being the seventh in an annual series of conferences represents for better and for worse a considerable tradition in the fast changing world of digital library related research and development. It is still a difficult and slow job to change traditional forms and formats of communication at and related to scientific conferences and also to change participants' expectations. Yet each new conference builds upon the topics and communities involved in previous events and inherits the commitment to quality established by its predecessors. Each year ECDL has to live up to its role of being the major European forum focusing on digital libraries and associated technical, practical and social issues.

bringing diverse disciplines and application communities together. There are still challenges in this respect ahead of us but the quality and range of papers and other contributions combined with opportunities for debate should ensure that ECDL 2003 sets high standards for the future.

With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes

intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Sample Research Paper On Technology PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Sample Research Paper On Technology free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole.
