of the ordinary Phenomenology which involves the questioning of that which we usually take for granted is for Natanson the essence of philosophy Drawing upon his philosophical predecessors Edmund Husserl Alfred Schutz and Jean Paul Sartre Natanson paves his own way with stories and examples that themselves bear witness to how phenomenology occurs in literature In considering such works as Samuel Beckett s Waiting for Godot Thomas Mann s The Magic Mountain and Franz Kafka s The Metamorphosis Natanson shows how literature opens us to the domain of possibility and how metaphor offers philosophical power when we think about freedom and change This book written by one of the twentieth century s leading phenomenologists will interest students in philosophy and in literature They will value the work particularly for its clarification of concepts and terms that frequently emerge in the contemporary intellectual climate

How do people experience power within capitalist societies? Research presented here explicitly addresses the notion of pluralistic power, which encompasses both productive and oppressive forms of power, and acknowledges that nuanced and multifaceted power relations can exist in combination with binary dynamics such as domination and resistance. This volume addresses growing interests in linking past and present power relationships engendered by capitalism and in conducting historical archaeology as anthropology. *The Plurality of Power: Industrial Capitalism and the Nineteenth Century Company Town of Fayette, Michigan* explores the subtle distribution of power within American industrial capitalism through a case study of a company town. Issues surrounding power and agency are explored in regard to three heuristic categories of power. In the first category, the company imposed a system of structural class-based power that is most visible in hierarchical differences in pay and housing, as well as consumer behavior. A second category addresses disciplinary activities surrounding health and the human body as observed in the built environment: medical artifacts, disposal patterns of industrial waste, incidence of intestinal parasites, and unequal access to healthcare. The third ensemble of power relations is heterarchical and entwined with non-economic capital: social, symbolic, and cultural. Individuals and groups drew upon different forms of capital to bolster social status and express identity both within and apart from the corporate hierarchy. The goal in combining these diverse ideas is to explore the plurality of power relationships in past industrial contexts and to assert their relevance in the anthropology of capitalism. Doing Practitioner Research Differently Marion Dadds, Susan Hart, 2002-11-01. *Doing Practitioner Research Differently* encourages those embarking on practitioner research to consider the validity of innovative methods and styles of reporting. The book looks at three methods of enquiry and reporting: visualisation, conversation, and fictional writing. Using practitioners' own accounts and research reports as case studies, this book explores the reasons why some practitioners reject the traditional research methods. It looks at the challenges faced by these practitioners and the conditions in higher education that encourage or inhibit innovative practitioner research. The case studies used illustrate that there are modes of enquiry and reporting that can foster the development of professional thinking and practice.
