Miller, 1988-01-01 Many common assumptions about work are challenged in this book For example the findings refute the common assertion that work tasks can be categorized into instrumental or task activities versus caretaking or people oriented activities It is shown that regardless of the type of job tasks are accomplished through the management of relationships Other findings show that workers devise ingenious methods for maintaining dignity in the face of blatant oppression a conclusion neglected in traditional studies of work where prestige hierarchies are presumed to affect workers feelings about themselves This book integrates findings from qualitative studies of women's work experiences in 13
