

## High School Mathematics Lesson Plan: Algebra

Each lesson in the Adolescent Literacy Toolkit is designed to support students through the reading/learning process by providing instruction before, during, and after reading/learning.

Note that lessons incorporate the *gradual release of responsibility* model. When this model is used within a single lesson and over several lessons, students are provided with enough instruction and guidance to use the literacy strategies on their own. The following lesson includes some examples of explicit instruction and modeling, guided practice, and independent practice, but students need more practice and feedback than is possible within the context of a single lesson.

### Instructional Outcomes

**NCTM Standards:** 10.1 Analyze patterns, relations, and functions of one and two variables.  
1.4 Monitor and reflect on the process of mathematical problem solving.

**Content Learning Outcome:** Students will learn how to think about and connect mathematics text, examples, and exercises to determine when to use algebraic solutions to solve systems of equations.
