*Web Services Essentials* Ethan Cerami,2002-02-14 As a developer new to Web Services, how do you make sense of this emerging framework so you can start writing your own services today? This concise book gives programmers both a concrete introduction and a handy reference to XML web services, first by explaining the foundations of this new breed of distributed services and then by demonstrating quick ways to create services with open source Java tools. Web Services make it possible for diverse applications to discover each other and exchange data seamlessly via the Internet. For instance, programs written in Java and running on Solaris can find and call code written in C that runs on Windows XP or programs written in Perl that run on Linux without any concern about the details of how that service is implemented. A common set of Web Services is at the core of Microsoft's new .NET strategy, Sun Microsystems's Sun One Platform and the W3C's XML Protocol Activity Group. In this book, author Ethan Cerami explores four key emerging technologies: XML Remote Procedure Calls, XML RPC, SOAP. The foundation for most commercial Web Services development: Universal Discovery, Description and Integration (UDDI), Web Services Description Language (WSDL). For each of these topics, *Web Services Essentials* provides a quick overview, Java tutorials with sample code, samples of the XML documents underlying the service, and explanations of freely available Java APIs. Cerami also includes a guide to the current state of Web Services, pointers to open source tools, and a comprehensive glossary of terms. If you want to break through the Web Services hype and find useful information on these evolving technologies, look no further than *Web Services Essentials*.      *Retail Product Management* Rosemary Varley,2001 This text represents a specialist text resource for students of retail management or marketing courses and modules, providing the reader with the opportunity to acquire a deeper knowledge of a key area of retailing management: managing the product range.
