Resolution of International Tax Disputes David Rüll, 2024-06-10 The number of international tax disputes is constantly increasing This is a logical consequence of the pressure that is exerted on the global tax system by a rise in the number of internationally active and mobile taxpayers and tax competition between states on the one hand On the other hand the implementation of measures to tackle base erosion and profit shifting BEPS by multinational enterprises already gives rise to further disputes and another increase of disputes might arise from the latest reforms of the international tax system namely the Two Pillar Solution to address the tax challenges arising from the digitalisation of the economy Against this background the time is right for an institutionalised international tax dispute resolution mechanism that takes into account the interests of taxpayers states and the public and allows for a swift and binding resolution of international tax disputes exactly what this timely and thoroughgoing book offers A comprehensive overview of existing international tax dispute resolution mechanisms and an analysis of their procedural rules advantages and disadvantages leads to a deeply informed proposal on how they can be further developed in a way that ensures greater fairness and equity for all stakeholders Among the lines of conflict that characterise international tax disputes the author sheds clear light on how improvements in the design of dispute resolution mechanisms may be found This includes these questions How should a dispute resolution mechanism be structured Should there be a mandatory resolution if the states cannot agree In which way should taxpayers participate in the procedure Should

agreements and decisions be published Should there be an institution to administer the procedure The book concludes with a draft convention that would implement the author s suggestions Tax lawyers and other tax professionals worldwide as well as national tax authorities will benefit greatly from this book They will deepen their understanding of the variety of existing tax dispute resolution mechanisms and discover ways to strengthen them Academics will find ample room to reflect on the key design elements of such mechanisms and how to improve them *Military Construction and Veterans Affairs, and Related Agencies Appropriations for Fiscal Year ...* United States.
