approach to virtual training Idea-Based Learning Edmund J. Hansen, 2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness and finally aligning the learning outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds *Web-Based Training* Margaret Driscoll, 2010-04-15 This all new edition of Web Based Training is filled with practical charts tables and checklists that shows you how to design winning training programs for delivering instruction on the Web Well grounded in the time tested principles of great instructional design and adult education Web Based Training takes a step back from the whirlwind of technical guides and offers a extensively researched handbook For everyone seeking to learn more about the subject Driscoll gives you illustrative examples from a wide range of organizations large and small Note CD ROM DVD and other supplementary materials are not included as part of eBook file **Advanced Technologies Applied to Training Design** Robert J. Seidel, Paul R. Chatelier, 2012-12-06 This collection of papers is the result of a workshop sponsored by NATO s Defense Research Group Panel 8 in the Fall of 1991 The workshop is the second of a series the first of which was held in the Spring of 1985 As you study these papers recall that this workshop occurred during the time that many changes were occurring in Eastern Europe and world wide The need to identify training technologies for maintaining a capable and ready force during times of decreases in military force structure was and is currently our

challenge The opportunities for these technologies to provide a service and opportunity for nonmilitary usage is our future Therefore this workshop maintained its focus on technology and application regardless of the user These and other statements made herein are personal and reflect the opinions of the author s and in no way represent the official position or policy of our individual governments v PREFACE The truly international contributions to this book reinforced our belief that training technology must be collaborative and data widely shared to strengthen our future We want to thank the authors of these papers for their abilities to see beyond the near horizon Their contributions and the support of the organizations that sponsored their work is greatly appreciated We also gratefully recognize the contributions of all who attended the workshop
