Stulz,2007-11-01 Until about twenty years ago the consensus view on the cause of financial system distress was fairly simple

a run on one bank could easily turn to a panic involving runs on all banks destroying some and disrupting the financial system Since then however a series of events such as emerging market debt crises bond market meltdowns and the Long Term Capital Management episode has forced a rethinking of the risks facing financial institutions and the tools available to measure and manage these risks The Risks of Financial Institutions examines the various risks affecting financial institutions and explores a variety of methods to help institutions and regulators more accurately measure and forecast risk The contributors from academic institutions regulatory organizations and banking bring a wide range of perspectives and experience to the issue The result is a volume that points a way forward to greater financial stability and better risk management of financial institutions

*What Can We Learn from Financial Stability Reports?* Mr. Fabio Comelli, Ms. Sumiko Ogawa, 2021-07-30 This paper reviews the approaches to systemic risk analysis in 32 central bank financial stability reports FSRs We compare and contrast the systemic risk analysis in FSRs with the IMF Article IV staff reports noting that Article IV staff reports and FSRs frequently pick up analytical content from each other All reviewed FSRs include a systemic risk assessment which has not always been the case in Article IV staff reports Also compared to Article IV staff reports on average FSRs tend to cover a wider range of financial risks and vulnerabilities and tend to have more extensive discussions of the policy mix to mitigate systemic risk In these assessments FSRs utilize sophisticated analytical tools such as stress tests and growth at risk more frequently than Article IV staff reports We emphasize that a central bank FSR typically presents a rich resource that IMF country teams can leverage as already done by some in forming their independent view about systemic risk
