slavery she argues that beneath efficiency's seemingly endless variety lies a common theme the pursuit of mastery through techniques of surveillance discipline and control Six historical case studies two from Britain one each from France and Germany and two from the United States illustrate the concept's fascinating development and provide context for the meanings of and uses for efficiency today and in the future *Science in the Middle Ages* David C. Journal of Economic and Social Measurement, 1986 **Title Announcement Bulletin**, 1957 Care in the Community Martin Knapp, Paul Cambridge, Corinne Thomason, Jennifer Beecham, Caroline Allen, ROBIN Darton, 2018-12-14 First published in 1992 this second book in the series fully described the evaluation programme and seeks to answer pressing questions of policy and practice This book is split into four parts Introduction to the pilot programme the projects and their clients the policy contexts the objectives the research methodology The Process of care financing accommodation and service use staffing case management joint working Evaluation Outcomes for clients and others and costs for each of the client's groups people with learning difficulties people with mental health problems elderly people and people with physical disabilities Finally this book aims to further discuss Policy and practice implications **The Reception of Darwinian Evolution in Britain, 1859-1909** Martin Hewitt, 2024-10-20 The Reception of Darwinian Evolution in Britain 1859 1909 Darwinism's Generations uses the impact of Charles Darwin's *On the Origin of Species* 1859 in the 50 years after its publication to demonstrate the effectiveness of a generational framework for understanding the cultural and intellectual history of Britain in the nineteenth century It challenges conventional notions of the Darwinian Revolution by examining how people from across all sections of society actually responded to Darwin's writings Drawing on the opinions and interventions of over 2 000 Victorians drawn from an exceptionally wide range of archival and printed sources it argues that the spread of Darwinian belief was slower more complicated more stratified by age and ultimately shaped far more powerfully by divergent generational responses than has previously been recognised In doing so it makes a number of important contributions It offers by far the richest and most comprehensive account to date of how contemporaries came to terms with the intellectual and emotional shocks of evolutionary theory It makes a compelling case for taking proper account of age as a fundamental historical dynamic and for the powerful generational patternings of the effects that age produced It demonstrates the extent to which the most common sub periodisation of the Victorian period are best understood not merely as constituted by the exigencies of events but are also formed by the shifting balance generational influence Taken together these insights present a significant challenge to the ways historians currently approach the task of describing the nature and experience of historical change and have fundamental implications for our current conceptions of the shape and pace of historical time
