The Media, Animal Conservation and Environmental Education John Blewitt, 2013-10-31 Natural History filmmaking has a long history but the generic boundaries between it and environmental and conservation filmmaking are blurred Nature environment and animal imagery has been a mainstay of television campaigning organisations and conservation bodies from Greenpeace to the Sierra Club with vibrant images being used effectively on posters leaflets and postcards and in coffee table books media releases short films and viral emails to educate and inform the general public However critics suggest that wildlife film and photography frequently convey a false image of the state of the world s flora and fauna The environmental educator David Orr once remarked that all education is environmental education and it is possible to see all image based communication in the same way The Media Animal Conservation and Environmental Education has contributions from filmmakers photographers researchers and academics from across the globe It explores the various ways in which film television and video are and can be used by conservationists and educators to encourage both a greater awareness of environmental and conservation issues and practical action designed to help endangered species This book is based on a special issue of the journal Environmental Education Research **Assessment in Middle and High School Mathematics** Daniel Brahier, 2013-10-30 It describes each strategy and clarifies its advantages and drawbacks Also included is a large sample of classroom tested examples along with sample student responses These examples can be used as is or you can customize them for your own class This book will help prepare your students for standardized tests that include items requiring evidence of conceptual understanding The strategies reflect the assessment Standards benchmarks established by the NCTM In addition an entire chapter is devoted to help teachers use these assessments to arrive at their students grades *Composing a Teacher Study Group* Richard J. Meyer, With Linda Brown, Elizabeth DeNino, Kimberly Larson, Mona McKenzie, 2013-10-18 There has been a flurry of writing about teachers as inquirers and researchers as well as books about children as inquirers This volume brings these two areas together teachers and students are inquiring at Ridgeway Elementary School It demonstrates the importance of thought collectives as forums for student and teacher learning The children in the primary classrooms in this book are working to understand the world around them and their place in it as literate individuals Their teachers are studying themselves and the students No other book describes the way this work affects children teachers and the ethos of the school in which the work occurs In that sense this book is groundbreaking in that it is an honest portrayal of the joys and sorrows the successes and the stumbling blocks the clear vision and the obfuscating that teachers live as they enact a life of asking questions being curious wandering and wondering Acknowledging and honoring the many faces of inquiry in schools this book demonstrates the children s inquiry their teachers inquiry and the place of that inquiry in schools It lays out the ways in which inquiry is fundamental to teaching and learning in a democracy in which all of the members of the community have a voice in deciding curricular directions and

ways of presenting learning Teachers are presented as thinkers and learners not merely as technicians enacting others views of what is to be learned and when Readers will find teachers dealing with the real issues of life in schools they will see how teachers can use their existing situations as points of departure for their growth and their students learning
