workshop was organized in Berlin under the topics mechanisms and phenomena metallurgy and materials modelling and simulations as well as testing and standardization It consisted of 20 individual contributions from eight countries which were compiled in a book that found a very ready market not only in the welding community As a consequence of increasing interest it has been decided to establish the Workshop on Hot Cracking Phenomena in Welds as a regular event every three years embedded in the International Institute of Welding IIW Attached to the IIW Commission IX and II Spring intermediate meetings the second workshop was organized in March 2007
