Stress Concentrations in Laminated Composites Seng C. Tan,2017-10-19 From the Author's PrefaceThe objective of this book is to provide a thorough and systematic study of the problem of laminated composites containing stress concentrations Stress concentrations are introduced in laminated plates in the forms of circular holes elliptical openings and straight cracks These forms of cutouts have many practical applications and are familiar to most engineers Stress concentrations exist in all known structural components Stress concentrations have great practical importance because they are normally the cause of failure In addition to stress analyses of laminated composites we need more fundamental understanding of the failure mode the failure criterion the effects on global laminate response and the design of composites in the presence of stress concentrations

On the Boundaries of Talmudic Prayer Yehuda

Septimus, 2015-05-28. The English term prayer is usually understood as communication with God or the gods. Scholars of Jewish ritual until now have accepted this characterization and applied it to Jewish tefillah. Does rabbinic prayer indeed necessarily entail second-person address to God, as many scholars of rabbinic prayer to this point have presumed? In this work Yehuda Septimus investigates a boundary phenomenon of talmudic prayer: ritual speech with addressees other than God. The book represents a fresh look at the possible range of performances undertaken by talmudic ritual prayer. Moreover, it places that range of performances into the historical context of the rapid emergence of prayer as the centerpiece of Jewish worship in the first half of the first millennium CE.
