Test Form A The High Middle Ages:

Paradoxes of Conscience in the High Middle Ages Peter Godman, 2009-06-04 The autobiographical and confessional writings of Abelard Heloise and the Archpoet were concerned with religious authenticity spiritual sincerity and their opposite fictio a composite of hypocrisy and dissimulation lying and irony How and why moral identity could be feigned or falsified were seen as issues of primary importance and Peter Godman here restores them to the prominence they once occupied in twelfth century thought This book is an account of the relationship between ethics and literature in the work of the most famous authors of the Latin Middle Ages Combining conceptual analysis with close attention to style and form it offers a major contribution to the history of the medieval conscience *The Church in the Early Middle Ages* G.R. Evans, 2007-03-28 The creation of a new history of the Church at the beginning of the third millennium is an ambitious but necessary project Perhaps nowhere is it needed more than in re describing the Church s development its life and its thinking in the period that followed the end of the early Church in antiquity The cultural social and political dominance of Christendom in what we now call the West from about 600 1300 made the Christian Church a shaper of the modern world in respects which go far beyond its religious influence Writing with her customary authority and with a magisterial grasp of the original sources G R Evans brings this formative era vividly to life both for the student of religious history and general reader She concentrates as much on the colourful human episodes of the time as on broader institutional and intellectual developments The result is a compelling and thoroughly modern introduction to devotional and theological thought in the early Middle Ages as well as to ecclesiastical and pastoral life at large *Resources in Education* ,1996 **The Comparison of Pupils' Achievement with Their Capacity** Charles Watters Odell, 1929 **Normal Human Aging** Gerontology Research Center (U.S.), 1984

Urban Historical Geography Dietrich Denecke, Gareth Shaw, 1988-06-30 Originally published in 1988 this book provides a fascinating comparative review of research in urban historical geography in Britain and West Germany It draws together a wide range of material on the history of urban development to explore the theoretical and methodological possibilities offered by comparative surveys of contrasting national and regional urban expenses The chronological focus of the essays ranges in time from the medieval period onwards and the contributors explore not only the specifically intellectual consequences of their empirical research but also its policy implications for urban planners and conservationists Serious extended comparative debate has hitherto been absent from the field of urban historical geography as a whole this volume sought to reverse that trend and in so doing to establish a fresh research agenda for an important and expanding discipline

Reckoning with Homelessness Kim Hopper, 2014-07-15 It must be some kind of experiment or something to see how long people can live without food without shelter without security Homeless woman in Grand Central Station Kim Hopper has dedicated his career to trying to address the problem of homelessness in the United States In this powerful book he draws upon his dual strengths as anthropologist and advocate to provide a deeper understanding of the roots of homelessness He also investigates the complex attitudes brought to bear on the issue since his pioneering fieldwork with Ellen Baxter twenty years ago helped put homelessness on the public agenda Beginning with his own introduction to the problem in New York Hopper uses ethnography literature history and activism to place homelessness into historical context and to trace the process by which homelessness came to be recognized as an issue He tells the largely neglected story of homelessness among African Americans and vividly portrays various sites of public homelessness such as airports His accounts of life on the streets make for powerful reading

Consumption and Generational Change Ian Rees Jones, Paul Higgs, David J. Ekerdt, 2011-12-31 The study of consumption in social life is growing Moving from being a relatively

unimportant part of the processes of production distribution and exchange questions of how people consume and to what ends now occupy center stage Today s capitalism is exemplified by a global arena of consumption in which distance is no obstacle to distribution and ownership Equally social distinctions that accompanied classically modern forms of consumption are now more complex and fluid than classifications of high and popular culture allow This book addresses the rise of consumer culture and the various attempts to explain and account for it It considers the view that a particular generational framework was formed in the post war period and has been carried on into the early twentieth century with particular consequences for the experience of later life The rise of individualism of mass consumption leisure and lifestyles have been accompanied by the democratization of social forms and for many a corrosion of community and social cohesion The text highlights how understanding is gained from examining the generational habits that developed in tandem with the rise of mass consumption Drawing on historical perspectives and comparative studies the book addresses social change with reference to generation effects and conflict Having set the scene in terms of the literature on consumption lifestyles and generational change the volume poses key questions in relation to the transformation of later life that are addressed in turn by the contributors This is a key volume as we enter the second decade of a new century

Medieval Misogyny and the Invention of Western Romantic Love R. Howard Bloch, 2009-02-15 Until now the advent of Western romantic love has been seen as a liberation from or antidote to ten centuries of misogyny In this major contribution to gender studies R Howard Bloch demonstrates how similar the ubiquitous antifeminism of medieval times and the romantic idealization of woman actually are Through analyses of a broad range of patristic and medieval texts Bloch explores the Christian construction of gender in which the flesh is feminized the feminine is aestheticized and aesthetics are condemned in theological terms Tracing the underlying theme of virginity from the Church Fathers to the courtly poets Bloch establishes the continuity between early Christian antifeminism and the idealization of woman that emerged in the twelfth and thirteenth centuries In conclusion he explains the likely social economic and legal causes for the seeming inversion of the terms of misogyny into those of an idealizing tradition of love that exists alongside its earlier avatar until the current era This startling study will be of great value to students of medieval literature as well as to historians of culture and gender
