

THE VIRGINIA PHARMACY TECHNICIAN EXAM

STUDY GUIDE

The Virginia Pharmacy Technician Exam ("Exam") was developed as an objective means of measuring pharmacy technicians' knowledge of basic job responsibilities as required by Virginia law. The purpose of this Study Guide is to help pharmacy technicians prepare for the Exam. This Study Guide includes: (1) a description of the major areas covered on the Exam and the relative weight given to each area; (2) a list of key words to help you prepare for the exam; (3) a list of selected statutes and regulations affecting pharmacy technicians in Virginia; (4) sample exam questions and answer key; and (5) information about registering for the Exam.

1. TOPICS COVERED ON THE EXAM

The Exam will consist of 50 questions. As with all standardized tests, this Exam contains a few questions that are being pretested for possible use on future exams. Pretesting additional questions is necessary to assure that all items perform properly and that new versions of the Exam can be used in the future. Therefore, 45 of the 50 questions will be scored. All 45 of the questions that will be graded have been pretested to determine their reliability and validity and accepted by an expert panel approved by the Virginia Board of Pharmacy. The pretest items will not be identified for the candidate in order to assure that test statistics are valid. A score of 75% or greater is needed to pass. (In other words, at least 34 of the 45 questions graded must be answered correctly to achieve a passing score.) These will be one hour for the Exam.

As with all standardized tests, there are multiple versions of this Exam. The various versions are carefully equated to assure that all have similar degrees of difficulty.

Questions on the Exam can be divided into 15 categories as outlined below. Because various types of questions are being pretested, the exact number of questions from each category cannot be predicted in advance. Following is a list of the 15 major areas covered on the Exam and educational objectives that you should attempt to master. While this is not represented as an exhaustive list of everything you should know, being able to satisfy these educational objectives and the related concepts will help you prepare for the Exam.

Topic	Number of Questions
Technician Duties and General Information <ul style="list-style-type: none">• Describe the functions a technician may perform.• Describe the pharmacy duties that only a pharmacist may perform.• Explain the importance of maintaining patient confidentiality.• Identify the federal and state agencies and regulations affecting pharmacy.	4 or 5
