Todd-Breland, 2018-10-03 In 2012 Chicago's school year began with the city's first teachers strike in a quarter century and ended with the largest mass closure of public schools in U.S. history. On one side a union leader and veteran black woman educator drew upon organizing strategies from black and Latinx communities to demand increased school resources. On the other side the mayor backed by the Obama administration argued that only corporate style education reform could set the struggling school system aright. The stark differences in positions resonated nationally challenging the long standing alliance between teachers unions and the Democratic Party. Elizabeth Todd Breland recovers the hidden history underlying this battle. She tells the story of black education reformers community based strategies to improve education beginning during the 1960s as support for desegregation transformed into community control experimental schooling models that predated charter schools and black teachers challenges to a newly assertive teachers union. This book reveals how these strategies collided with the burgeoning neoliberal educational apparatus during the late twentieth century laying bare ruptures and enduring tensions between the politics of black achievement urban inequality and U.S. democracy **A Smarter Charter**

Richard D. Kahlenberg, Halley Potter, 2014-12-04 A remarkable new book. Wise and energetic advocates such as Kahlenberg and Potter can take the charter movement in new and useful directions. The Washington Post. Moving beyond the debate over whether or not charter schools should exist, *A Smarter Charter* wrestles with the question of what kind of charter schools we should encourage. The authors begin by tracing the evolution of charter schools from teacher union leader Albert Shanker's original vision of giving teachers room to innovate while educating a diverse population of students to today's charter schools where the majority of teachers are not unionized and student segregation levels are even higher than in traditional public schools. In the second half of the book the authors examine two key reforms currently seen in a small but growing number of charter schools: teacher voice and socioeconomic integration that have the potential to improve performance and reshape the stereotypical image of what it means to be a charter school. Important reading for policymakers, educators, researchers, and all citizens interested in the future of America's public schools. *A Smarter Charter* features Profiles of charter schools that are bucking the prevailing trends, including their performance data and the challenges they face. Best practices from successful charter schools such as methods for attracting a diverse student body and examples of innovative teacher contracts. Reform strategies that can improve student outcomes in a variety of public schools, not just charters. Kahlenberg and Potter have delivered a thought provoking, serious contribution. Agree or not with their views on the purpose and performance of charter schools, they have important things to say on where charters have been, where they need to go, and how they can get there. Friends and foes of charter schooling alike would do well to read this book. Frederick M. Hess, resident scholar and director of Education Policy Studies, American Enterprise Institute. Read this book and draw inspiration and ideas from charter schools.

Reed, 2014-06-26 Over the past fifty years the federal government's efforts to reform American public education have transformed U S schools from locally run enterprises into complex systems jointly constructed by federal state and local actors The construction of this federal schoolhouse an educational system with common national expectations and practices has fundamentally altered both education politics and the norms governing educational policy at the local level Building the Federal Schoolhouse examines these issues through an in depth fifty year examination of federal educational policies in the community of Alexandria Virginia a wealthy yet socially diverse suburb of Washington D C The epochal social transformations that swept through America in the past half century hit Alexandria with particular force transforming its Jim Crow school system into a new immigrant gateway district within two generations Along the way the school system has struggled to provide quality education for special needs students and has sought to overcome the legacies of tracking and segregated learning while simultaneously retaining upper middle class students Most recently it has grappled with state and federally imposed accountability measures that seek to boost educational outcomes All of these policy initiatives have contended with the existing political regime within Alexandria at times forcing it to a breaking point and at other times reconstructing it All the while the local expectations and governing realities of administrators parents politicians and voters have sharply constrained federal initiatives limiting their scope when in conflict with local commitments and amplifying them when they align Through an extensive use of local archives contemporary accounts school data and interviews Douglas S Reed not only paints an intimate portrait of the conflicts that the federal schoolhouse's creation has wrought in Alexandria but also documents the successes of the federal commitment to greater educational opportunity In so doing he highlights the complexity of the American education state and the centrality of local regimes and local historical context to federal educational reform efforts

God, Schools, and Government Funding Laurence H. Winer, Nina J. Crimm, 2016-04-15 In recent years a conservative majority of the U S Supreme Court over vigorous dissents has developed circumventions to the Establishment Clause of the First Amendment that allow state legislatures unabashedly to use public tax dollars increasingly to aid private elementary and secondary education This expansive and innovative legislation provides considerable governmental funds to support parochial schools and other religiously affiliated education providers That political response to the perceived declining quality of traditional public schools and the vigorous school choice movement for alternative educational opportunities

provokes passionate constitutional controversy Yet the Court's recent decision in *Arizona Christian School Tuition Organization v Winn* inappropriately denies taxpayers recourse to challenge these proliferating tax funding schemes in federal courts Professors Winer and Crimm clearly elucidate the complex and controversial policy legal and constitutional issues involved in using tax expenditures mechanisms such as exclusions deductions and credits that economically function as government subsidies to finance private religious schooling The authors argue that legislatures must take great care in structuring such programs and set forth various proposals to ameliorate the highly troubling dissention and divisiveness generated by state aid for religious education
