Tone Orthography and Literacy David Roberts,Stephen L. Walter,2021-07-15 This book presents the results of a series of literacy experiments in ten Niger Congo languages representing four language families and spanning five countries It asks the research question To what extent does

full tone marking contribute to oral reading fluency comprehension and writing accuracy and does that contribution vary from language to language One of the main findings is that the ethno literacy profile of the language community and the social profile of the individual are stronger predictors of reading and writing performance than are the linguistic and orthographic profiles of the language Our data also suggest that full tone marking may be more beneficial for less educated readers and those with less experience of L1 literacy The book will bring practical help to linguists and literacy specialists in Africa and beyond who are helping to develop orthographies for tone languages It will also be of interest to cognitive psychologists exploring the reading process and researchers investigating writing systems

Polyhedral Methods in Geosciences Daniele Antonio Di Pietro,Luca Formaggia,Roland Masson,2021-06-14 The last few years have witnessed a surge in the development and usage of discretization methods supporting general meshes in geoscience applications The need for general polyhedral meshes in this context can arise in several situations including the modelling of petroleum reservoirs and basins CO₂ and nuclear storage sites etc In the above and other situations classical discretization methods are either not viable or require ad hoc modifications that add to the implementation complexity Discretization methods able to operate on polyhedral meshes and possibly delivering arbitrary order approximations constitute in this context a veritable technological jump The goal of this monograph is to establish a state of the art reference on polyhedral methods for geoscience applications by gathering contributions from top level research groups working on this topic This book is addressed to graduate students and
