Insect Defenses 4

Insects use many strategies to keep themselves safe from predators. Some have wings that enable them to fly away when they feel threatened. Some insects like bees, sting any animal that gets too close.

Life of a Cicada 16

Cicadas can live up to 17 years. Once a cicada is an adult, it stays in the ground for 17 years. They come out of the ground and live for a short time. They are very hard to find because they only come out for a short time.

Warning Colors 18

Yellow, black, and red are warning colors. These colors tell predators to stay far away. Many insects have these colors to keep from getting hurt.

Early Travel 11

Years before the airplane was invented, traveling from one place to another was difficult and slow. Horses were used for traveling short distances. Even then, it took several hours just for a horse to travel a few miles. The airplane was even faster. People and objects could be transported all over the world in a short time.

Insect Defenses 4

La Clase Mágica Olga A. Vasquez, 2013-10-11 *La Clase Mágica* Imagining Optimal Possibilities in a Bilingual Community of Learners vividly captures the social and intellectual developments and the promises of an ongoing after school project called *La Clase Mágica*. It is a blow by blow description of the early transformations of a project that began as an educational activity and slowly but deliberately turned into a social action project whose aim was to serve those with low economic and political means and little access to educational resources. This multivocal account details research in action for effectively serving Spanish English bilingual speakers from a Mexican origin community as well as on a broader level the diverse populations that increasingly characterize American society today. The focus is on the early foundational work of the project between 1989-1996 though attention is also given to the national and international recognition the project has subsequently received the college going patterns of its long term participants and the transplantation of the project to other cultural communities. The book speaks out from the zones of contact between the university and a language minority community about new ways to extend and intersect theory and practice in many areas of the educational enterprise. Contact is defined not only in the physical sense of face to face interaction but also as symbolic interaction between languages cultures histories and epistemologies. Thus Vasquez speaks of optimal possibilities situated in the middle grounds or more technically speaking in the borders between Spanish and English Mexican and mainstream culture minority and majority designations and between school and community contexts where contact is made and new arrangements are imagined. This account uses the reflections of participants at times to take readers from the scientific to the everyday to make real and concrete the theoretical conceptualizations that box in human behavior. In this way it defines the theories methods and philosophies for linking multiple disciplines institutions and participant groups into a concerted effort with potential to reframe the educational opportunities of under served populations. A close look is provided into the intricacies and the fundamental principles for building and sustaining effective learning environments and institutional relations necessary for enhancing the potential of learners of all ages. In the process the book also suggests ways in which community members and institutional agents can play an active and integral role in creating learning opportunities that serve both constituencies. Educators and policymakers will find the systems approach for pursuing parent and community involvement in the educational enterprise useful. In sum the book offers researchers practitioners and policymakers much needed guidance insight and perhaps inspiration for rethinking educational goals and objectives.

Learning That Lasts Ron Berger, Libby Woodfin, Anne Vilen, 2016-02-17 A practical guide to deeper instruction a framework for challenging engaging and empowering students of all ages. For schools to meet ambitious new standards and prepare all students for college careers and life research has shown unequivocally that nothing is more important than the quality of daily instruction. *Learning That Lasts* presents a new vision for classroom instruction that sharpens and deepens the quality of lessons in all subject areas. It

is the opposite of a teacher proof solution. Instead it is predicated on a model of instruction that honors teachers as creative and expert planners of learning experiences for their students and who wish to continuously grow in their instructional and content knowledge. It is not a theoretical vision. It is a model of instruction refined in some of the nation's most successful public schools: schools that are beating the odds to create remarkable achievement, sited primarily in urban and rural low income communities. Using case studies and examples of powerful learning at all grade levels and in all disciplines, *Learning That Lasts* is a guide to creating classrooms that promote deeper understanding, higher order thinking and student independence. Through text and companion videos, readers will enter inspiring classrooms where students go beyond basics to become innovators, collaborators and creators. *Learning That Lasts* embraces a three dimensional view of student achievement that includes mastery of knowledge and skills, character and high quality work. It is a guide for teachers who wish to make learning more meaningful, memorable and connected to life and inspire students to do more than they think possible.

Written Documents in the Workplace Denis Alamargot, Patrice Terrier, Jean-Marie Cellier, 2008-01-09. Divided into three parts, the first of which provides a linguistic definition of professional documents describing their different types and genres. This definition necessarily takes into account both the formal characteristics of these types of document (e.g. nature of linguistic units involved and their functional goals, the way these linguistic units are used to fulfill the text's communicative aim). The second part focuses on the mental mechanisms involved in written production in the workplace. One of the aims of a professional writer is to compose a text which can be understood. Text composition involves specific processes and strategies that can be enhanced. One way of doing this is to give the writer suitable instructions while another is to provide him/her with a suitable writing environment. This last aspect leads us to devote the third and final section to the comprehension of written documents in the workplace. Awareness of the strategies implemented by different readers with more or less domain expertise in order to understand technical and professional documents can enhance the latter's readability. Contributions from linguists, psychologists and ergonomists from various countries ensure international scope and comprehensiveness. Bridges the gap between fundamental research into writing and reading and the issue of the efficiency of written communication in the workplace. Enables better content creation for professional writers.
