Recalibrating Juvenile Detention David W. Roush, 2019-02-07 *Recalibrating Juvenile Detention* chronicles the lessons learned from the 2007 to 2015 landmark US District Court ordered reform of the Cook County Juvenile Temporary Detention Center JTDC in Illinois following years of litigation by the ACLU about egregious and unconstitutional conditions of confinement. In addition to explaining the implications of the Court's actions, the book includes an analysis of a major evaluation research report by the University of Chicago Crime Lab and explains for scholars, practitioners, administrators, policymakers, and advocates how and why this particular reform of conditions achieved successful outcomes when others failed. Maintaining that the Chicago Crime Lab findings are the gold standard evidence-based research, EBR in pretrial detention, Roush holds that the observed firsts for juvenile detention may perhaps have the power to transform all custody practices. He shows that the findings validate a new model of institutional reform based on cognitive behavioral programming. CBT reveals statistically significant reductions in custody violence and recidivism and demonstrates that at least one variation of short-term secure custody can influence positively certain life outcomes for Chicago's highest risk and most disadvantaged youth. With the *Quarterly Journal of Economics* imprimatur and endorsement by the President's Council of Economic Advisors, the book is a reverse engineering of these once-in-a-lifetime events: recidivism reduction and EBR in pretrial detention that explains the important and transformative implications for the future of juvenile justice practice. The book is essential reading for graduate students in juvenile justice, criminology, and corrections, as well as practitioners, judges, and policymakers.

Emergency Research Ethics A.M. Viens, 2017-03-02 The essays selected for this volume focus on issues that arise when attempting to design, review, and undertake research involving human participants who are experiencing a private or public emergency. The volume is unique in that it is the first collection to exclusively deal with all of the central ethical aspects of conducting human subject research in the context of emergency.

The Judge and the Proportionate Use of Discretion Sofia Ranchordás, Boudewijn de Waard, 2015-06-12 This book examines different legal systems and analyses how the judge in each of them performs a meaningful review of the proportional use of discretionary powers by public bodies Although the proportionality test is not equally deep rooted in the literature and case law of France Germany the Netherlands and the United Kingdom this principle has assumed an increasing importance partly due to the influence of the European Court of Justice and European Court of Human Rights In the United States different standards of judicial review are applied to review

arbitrary and capricious agency discretion However do US judges achieve a similar result to the proportionality or reasonableness test Drawing together a selection of key experts in the field this book analyses the principle of proportionality in the judicial review of administrative decisions from different perspectives The principle is first examined in the context of recent developments in the literature and case law including the inevitable EU influence then light shall be shed on the meaning of this principle in the specific case law of the European Court of Justice and European Court of Human Rights Finally the authors go on to explore the ways in which US judges consciously sanction the disproportionate and or unreasonable use of agency discretion In the legal systems where the proportionality test plays a very limited role Ranchord s and de Waard also try to clarify why this is the case and look at what alternative solutions have been found This book will be of great interest to scholars of public and administrative law and EU law
