Communication, Digital Media, and Popular Culture in Korea Dal Yong Jin, Nojin Kwak, 2018-05-16 In recent decades Korean communication and media have substantially grown to become some of the most significant segments of Korean society. Since the early 1990s, Korea has experienced several distinctive changes in its politics, economy, and technology, which are directly related to the development of local media and culture. Korea has greatly developed several cutting-edge technologies such as smartphones, video games, and mobile instant messengers to become the most networked society throughout the world. As the Korean Wave exemplifies, the once small and peripheral Korea has also created several unique local popular cultures, including television programs, movies, and popular music known as K-pop, and these products have penetrated many parts of the world. As Korean media and popular culture have rapidly grown, the number of media scholars and topics covering these areas in academic discourses has increased. These scholars' interests have expanded from traditional media such as Korean journalism and cinema to several new cutting-edge areas like digital technologies, health, communication, and LGBT-related issues. In celebrating the Korean American Communication Association's fortieth anniversary in 2018, this book documents and historicizes the growth of growing scholarship in the realm of Korean media and communication.

It suggests we could be entering an emerging third wave of analysis and interpretation following its early technical and operational beginnings and the subsequent shift to a focus on projects and their management. Topics dealt with include the historical evolution of the subject, its theoretical base, professionalism, business and societal context, strategy, organization, governance, innovation, overruns, risk, information management, procurement, relationships, and trust, knowledge management, practice, and teams. This handbook is of particular relevance to those interested in the research issues underlying project management.
