Chapter 9 Project Teacher Notes: Get the Picture

About the Project

The Chapter Project gives students an opportunity to use sequences, explicit formulas, and recursive formulas to change the size of drawings and photos. They investigate perspective, the use of grids to enlarge and reduce, and ways to crop, enlarge, and reduce photographs.

Introducing the Project

- Ask students if they have ever seen artists draw buildings or other objects that appear to recede in the distance.
- Ask them why it appears that railroad tracks get closer together when we look at them in the distance.
- Explain that they will investigate the concepts of perspective and vanishing points, and the mathematics involved in enlarging, reducing, and cropping pictures and photographs.

Activity 1: Researching

Students research perspective, create drawings in perspective, write explicit and recursive formulas, and determine explicit or recursive formulas for their sequences.

Activity 2: Designing

Students use grid paper to enlarge designs. They use the same ratios repeatedly to draw lengths and widths from geometric sequences. They then write explicit or recursive formulas for their sequences.

Activity 3: Analyzing

Students crop photos. Then they enlarge the cropped photos, writing sequences for the widths of the enlargements.

Finishing the Project

- The final week to plan a project day on which students share their completed projects. Encourage students to explain their processes as well as their results.
- Have students use their skills to enlarge explicit and recursive formulas for arithmetic and geometric sequences.
 - Ask groups to share their insights that resulted in completing the project, such as any shortcuts they found for making their drawings or writing formulas.

Chapter 9 Cumulative Review (continued)

Short Response

- Graph the system of inequalities $\begin{cases} y < 2x - 1 \\ y \geq -x + 2 \end{cases}$.
- Describe how the graph of $y = \log_2(x - 2) + 5$ compares to the graph of the parent function.
 The graph of $y = \log_2(x - 2) + 5$ is a shift of the graph of the parent function $y = \log_2 x$ to the right two units and up five units.
- How can the relationship between variables in the table be described?
 The variables in the table, x and y , have an inverse variation relationship. As x -values increase, y -values decrease, but the product of these pairs remains constant.

x	y
1	20
2	10
4	5
8	2.5

- Use the sequence 100, 95, 90, 85, ... This is an arithmetic sequence in which each term is 5 less than the previous one.
 a. Find the next three terms. **80, 75, 70**
- Water leaks from a 10,000-gal tank at a rate of 5 gal/h. Write a linear model for the situation and use it to find the amount of water in the tank after 24 h. **$w = -5t + 10,000$; 8000 gal**

Extended Response

- You have a coupon for \$10 off a CD. You also get a 20% discount if you share your membership card in the CD club. How much more would you pay if the member applies the coupon first? Use composite functions. Show your work.

Chapter 9 Project: Get the Picture

Beginning the Chapter Project

When a teacher is taking notes, artists, designers, and photographers work with ratios and dilations to make the pages visually attractive. These professionals often work with pictures involving arithmetic and geometric sequences.

In this project, you will see how perspective affects perceived lengths and distances. You will use grids to change the size of drawings. You also will learn how a designer crops a photo, then enlarges or reduces it.

Activities

Activity 1: Researching

Study the concepts of one- and two-point perspective and vanishing points in art.

- Observe the lengths of the arrows shown at the right. What is the relationship between their lengths? (How does this relate to your research on perspective?)
- Trace the four arrows at the right, making the right one the left when tracing the longest arrow so that it is farther away from the others than it is now. What do you notice?
- Make a simple drawing of three or more similar objects whose lengths can be represented by an arithmetic sequence. Write the corresponding arithmetic sequence, and a recursive or explicit formula for that sequence.
- Check students' work, approximately every 10 minutes. How long does it take to complete the sequence, approximately every 10 minutes? How long does it take to complete the sequence, approximately every 10 minutes?
