Foundations of Software Science and Computational Structures Luke Ong, 2010-03-16 This book constitutes the refereed proceedings of the 13th International Conference on Foundations of Software Science and Computational Structures FOSSACS 2010 held in Paphos Cyprus in March 2010 as part of ETAPS 2010 the European Joint Conferences on Theory and Practice of Software The 25 revised full papers presented together with the abstract of the keynote lecture were carefully reviewed and selected from 86 full paper submissions The papers are organized in topical sections on semantics of programming languages probabilistic and randomised computation concurrency and process theory modal and temporal logics verification categorical and coalgebraic methods as well as lambda calculus and types

Foundations of Software Science and Computation Structures Mogens Nielsen, Uffe Engberg, 2003-08-01 ETAPS 2002 is the fth instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprises ve conferences FOSSACS FASE ESOP CC TACAS thirteen satellite workshops ACL2 AGT CMCS COCV DCC INT LDTA SC SFEDL SLAP SPIN TPTS and VISS eight invited lectures not including those that are specific to the satellite events and several tutorials The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive

Foundations of Software Science and Computational Structures Roberto Amadio, 2008-04-03 This book contains the proceedings of the 11th International Conference on Foundations of Software Science and Computational Structures It covers theories and methods to support analysis synthesis transformation and verification of software systems

Mathematical Foundations of Computer Science 1988 Michal Chytil, Ladislav Janiga, Václav Koubek, 1988 This volume contains 11 invited lectures and 42 communications presented at the 13th Conference on Mathematical Foundations of Computer Science MFCS 88 held at Carlsbad Czechoslovakia August 29 September 2 1988 Most of the papers present material from the following four fields complexity theory in particular structural complexity concurrency and parallelism formal language theory semantics Other areas treated in the proceedings include functional programming inductive syntactical synthesis unification algorithms relational databases and incremental attribute evaluation

Mathematical Foundations of Image Processing and Analysis, Volume 1 Jean-Charles Pinoli, 2014-07-09 Image processing and image analysis are typically important fields in information science and technology By image processing we generally understand all kinds of operation performed on images or sequences of images in order to increase their quality restore their original content emphasize some particular aspect of the

information or optimize their transmission or to perform radiometric and or spatial analysis By image analysis we understand however all kinds of operation performed on images or sequences of images in order to extract qualitative or quantitative data perform measurements and apply statistical analysis Whereas there are nowadays many books dealing with image processing only a small number deal with image analysis The methods and techniques involved in these fields of course have a wide range of applications in our daily world industrial vision material imaging medical imaging biological imaging multimedia applications satellite imaging quality control traffic control and so on

Mastering Algebra Sachin Nambeesan, 2025-02-20 Mastering Algebra is a comprehensive and student friendly exploration of fundamental principles and advanced applications of algebra tailored specifically for undergraduate students We provide a valuable resource for those seeking to deepen their understanding of algebraic theory and its diverse range of applications across various disciplines Our book starts with foundational concepts such as algebraic manipulation equation solving and functions It then progresses to more advanced topics including linear algebra abstract algebra and algebraic geometry offering a seamless transition from basic to advanced algebraic theory What sets this book apart is its emphasis on clarity coherence and practical relevance Each chapter is meticulously crafted to provide clear explanations of complex concepts supported by illustrative examples and thought provoking exercises that encourage active learning and critical thinking Furthermore Mastering Algebra highlights the practical applications of algebra in fields such as physics computer science engineering and economics demonstrating its importance and versatility in solving real world problems Whether you are a mathematics major looking to deepen your understanding of algebraic theory or a student from another discipline seeking to strengthen your quantitative skills this book is your essential companion on the journey to mastering algebra Prepare to embark on an enriching intellectual adventure that will empower you to unlock the full potential of algebraic concepts and their applications

El-Hi Textbooks & Serials in Print, 2003 ,2003 Handbook of Process Algebra J.A. Bergstra, A. Ponse, S.A. Smolka, 2001-03-16 Process Algebra is a formal description technique for complex computer systems especially those involving communicating concurrently executing components It is a subject that concurrently touches many topic areas of computer science and

discrete math including system design notations logic concurrency theory specification and verification operational semantics algorithms complexity theory and of course algebra This Handbook documents the fate of process algebra since its inception in the late 1970 s to the present It is intended to serve as a reference source for researchers students and system designers and engineers interested in either the theory of process algebra or in learning what process algebra brings to the table as a formal system description and verification technique The Handbook is divided into six parts spanning a total of 19 self contained Chapters The organization is as follows Part 1 consisting of four chapters covers a broad swath of the basic theory of process algebra Part 2 contains two chapters devoted to the sub specialization of process algebra known as finite state processes while the three chapters of Part 3 look at infinite state processes value passing processes and mobile processes in particular Part 4 also three chapters in length explores several extensions to process algebra including real time probability and priority The four chapters of Part 5 examine non interleaving process algebras while Part 6 s three chapters address process algebra tools and applications

Applied Algebra, Algebraic Algorithms and Error-Correcting Codes
Shojiro Sakata,1991-07-10 The AAECC conferences focus on the algebraic aspects of modern computer science which include the most up to date and advanced topics The topic of error correcting codes is one where theory and implementation are unified into a subject both of mathematical beauty and of practical importance Algebraic algorithms are not only interesting theoretically but also important in computer and communication engineering and many other fields This volume contains the proceedings of the 8th AAECC conference held in Tokyo in August 1990 Researchers from Europe America Japan and other regions of the world presented papers at the conference The papers present new results of recent theoretical and application oriented research on applied algebra algebraic algorithms and error correcting codes

Transactions on Computational Science V
Yingxu Wang,Keith Chan,2009-06-12 The LNCS journal Transactions on Computational Science reflects recent developments in the field of Computational Science conceiving the field not as a mere ancillary science but rather as an innovative approach supporting many other scientific disciplines The journal focuses on original high quality research in the realm of computational science in parallel and distributed environments encompassing the facilitating theoretical foundations and the applications of large scale computations and massive data processing It addresses researchers and practitioners in areas ranging from aerospace to biochemistry from electronics to geosciences from mathematics to software architecture presenting verifiable computational methods findings and solutions and enabling industrial users to apply techniques of leading edge large scale high performance computational methods The fifth volume of the Transactions on Computational Science journal edited by Yingxu Wang and Keith C C Chan is devoted to the subject of cognitive knowledge representation This field of study focuses on the internal knowledge representation mechanisms of the brain and how these can be applied to computer science and engineering The issue includes the latest research results in internal knowledge representation at the logical functional physiological and biological levels and describes their impacts on computing artificial

ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques *New England Journal of Education* ,1897 **Catalog of Copyright Entries.
