**The Challenges for New Principals in the 21st Century** Bruce G. Barnett, Autumn K. Tooms, Alan R. Shoho, 2010-09-01 This book series International Research on School Leadership focuses on how present day issues affect the theory and practice of school leadership For this inaugural book we focused on the challenges facing new principals and headteachers Because the professional lives of school leaders have increasingly impinged on their personal well being and resources have continued to shrink it is important to understand how new principals or headteachers share and divide their energy ideas and time within the school day It is also important to discover ways to provide professional development and support for new principals and headteachers as they strive to lead their schools in the 21st century For these reasons this book is dedicated to exploring the rarely examined experiences of those who enter the role as new principals or headteachers By giving voice to new principals and headteachers we are able to determine what aspects of leadership preparation ring true and what aspects prove to be of little or no utility Unlike leadership texts that have focused

on conceptual considerations and personal narratives from the field this book focuses on a collection of empirical efforts centered on the challenges and issues that new principals and headteachers experience during their initial and crucial years of induction We solicited and accepted manuscripts that explore the multi faceted dimensions of being a new principal or headteacher in the 21st century Our goal was to create an edited book that examines the commonalities and differences that new principals and headteachers experience from an international perspective This edited book is comprised of six chapters each of which contributes a unique perspective on the responsibilities that new principals and headteachers are experiencing at the dawn of the 21st century      Data Rules Jim Knight, Michael Faggella-Luby, 2024-10-02

Data Rules provides much needed clarity on how instructional leaders can effectively leverage data It s no secret that using data can be a key driver of teacher growth and student achievement The only real question is how Coaching expert Jim Knight and professor Michael Faggella Luby distill decades of research into an accessible proven approach that explains Why data is important for transforming teaching A framework of 10 easy to apply rules for effective data use Best practices to communicate and discuss data How to analyze data for student engagement and achievement How to analyze data for instructional practice To help schools achieve sustained improvement this book also connects its data rules to the Impact Cycle Knight s field tested model for coaching teachers based on research from the Instructional Coaching Group ICG Equipped with the right tools any instructional leader or coach will be able to realize the full potential of data move the needle on classroom instruction and improve student outcomes This book is a copublication of ASCD and One Fine Bird Press      **A Comprehensive Guide to**
