Cordesman,2005-09-30 With continuing instability in Iraq the threat of a nuclear Iran and the ever present reality of further terrorist attacks within its own borders Saudi Arabia has been forced to make some hard decisions The current structure of the Saudi security apparatus is only one pathway to improved security Economic and demographic threats may well be the hardest hurdles to overcome What has been accomplished since 2001 and what are the real prospects and implications of further reform To what extent should the kingdom continue to rely on the US to protect its interests Cordesman and Obaid argue that it is time to put an end to client and tutorial relations Saudi Arabia must emerge as a true partner This will require the creation of effective Saudi forces for both defense and counterterrorism Saudi Arabia has embarked on a process of political economic and social reforms that reflects a growing understanding by the governing members of the royal family Saudi technocrats and Saudi businessmen that Saudi Arabia must reform and diversify its economy and must create vast numbers of new jobs for its young and growing population There is a similar understanding that economic reform must be combined with some level of political and social reform if Saudi Arabia is to remain stable in the face of change With Gulf security the war on terrorism and the security of some sixty percent of the world s oil reserves at stake the real question is how quickly Saudi Arabia can change and adapt its overall approach to security and how successful it will be in the process *Employee Motivation in Saudi Arabia* Rodwan Hashim Mohammed Fallatah,Jawad Syed,2017-11-29 This book investigates the relevance of Maslow s hierarchy of needs as a theory of motivation whilst taking into account variances in culture and individual experiences and perspectives Focussing on higher education the book responds to the call for providing alternative conceptual models other than those originating from the Anglo Saxon world The authors take a contextual approach and use the case of Saudi Arabia to understand motivation in a collectivist highly religious and conservative society of the Middle East Providing empirical findings from a study carried out at two Saudi universities differing in their religious outlook this book reveals a hierarchy of needs that is significantly different from the theory proposed by Maslow Religion culture and gender are explored in detail as the authors investigate the relevance of Maslow s theory in a region that is of growing interest to policy makers and practitioners in North America and Europe offering a truly insightful read to an international audience *International Business in the Middle East* Erdener Kaynak,2015-10-16 No detailed description available for International Business in the Middle East The Complete Idiot's Guide to Getting Government Jobs The Partnership for Public Svc,2010-05-04 Bail yourself out with employment opportunities In these turbulent times when private corporations are in trouble the em ployer that seems to be offering the

Cyber Law and Cyber Security in Developing and Emerging Economies Zeinab Karake-Shalhoub, Lubna Al Qasimi, 2010-01-01 This timely and important book illuminates the impact of cyber law on the growth and development of emerging and developing economies Using a strong theoretical framework firmly grounded in resource based and technology diffusion literature the authors convey a subtle understanding of the ways public and private sector entities in developing and emerging countries adopt cyber space processes This book reveals that the diffusion of cyber activities in developing and emerging economies is relatively low with the main stumbling blocks resting in regulatory cultural and social factors The authors argue that cyber crimes constitute a prime obstacle to the diffusion of e commerce and e governments in developing economies and governments have an important role in developing control mechanisms in the form of laws However setting appropriate policies and complementary services particularly those affecting the telecommunications sector and other infrastructure human capital and the investment environment severely constrains Internet access Using both strategic and operational perspectives the authors discuss the concrete experience of constructing and implementing cyber laws and cyber
