

PROCEDURE MANUAL

MDA Federal is the leading provider of quality-controlled weather data to the weather trading community. MDA Federal supports CME in the development and implementation of weather futures and options contracts by using the following methodology for quality control in the event of missing or erroneous observations.

The Approach for Real Time Quality Control of Observed Weather Elements

MDA Federal employs its meteorological and computer technology to produce an accurate set of weather data. This approach is a five-step systematic process.

Step 1. Decoding Data

Each morning MDA Federal decodes the respective data transmission feeds to determine what data exist for each station for which there is a corresponding futures/options contract, plus additional surrounding stations. Data are obtained from the following sources:

- United States: National Weather Service
- Canada: Environment Canada
- United Kingdom: U.K. Met Office
- France: Météo France
- Netherlands: KNMI
- Germany: Deutscher Wetterdienst
- Sweden: SMHI
- Spain: Ministerio de Medio Ambiente
- Italy: Italian Air Force
- Norway: Meteorologisk Institutt
- Japan: Japan Meteorological Agency
