Russey, 2004-03-12 Most scientists live in a publish or perish environment but few would describe themselves as brilliant or enthusiastic writers. Coming to the aid of all those wishing to improve the quality of their scientific writing, established researchers and aspiring students alike, three experienced authors, scientists from differing backgrounds and cultures, have compiled this classic guide. This new edition has been completely revised to reflect dramatic changes in communication over the past 15 years. The primary emphasis is on writing techniques, accurate expression, adherence to accepted standards, and above all, clarity. But the authors also venture into communication technology and organizational as well as ethical aspects of science. Numerous appendices and a particularly comprehensive index complete this highly useful book. The authors have a passion not only for clarity and economy of style but also for precision and consistency. Nature A wealth of information contained in a single book of manageable proportions. Students reporting on a simple laboratory experiment and their teachers preparing a paper or lecture will both find this book a constant companion.

It is also an ability that despite its importance is often overlooked by research courses and senior level mentors. This straightforward pocket guide to Preparing Research Articles steps into the void as an insiders guide to getting published. Drawing on nearly 20 years of experience editing a social work research journal, Bruce A. Thyer has crafted a candid companion to the journal publishing process, unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve. Thyer's frank advice on selecting an appropriate journal, handling rejections and revisions, understanding confusing concepts like impact factors and electronic publishing, and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher/writer.
