| Shutter Lag and Start Up Time | Remember that the quoted continuous-shooting speed of a camera often applies to circumstances in which the flash is off, the focus and exposure are locked during the first picture of the batch.                                                                |
| Image Quality                 | Despite the camera's megapixel count, larger sensors and lenses typically result in sharper images. DSLRs take such beautiful pictures because of their larger sensors and higher-quality lenses, which generally produce better shots, especially in low light. |
