Krill Fisheries of the World Stephen Nicol,Yoshinari Endo,Food and Agriculture Organization of the United Nations,1997-01-01 Euphausiids or krill have been harvested since at least the 19th century and possibly earlier Fisher et al 1953 It is however only in the last 50 years that large scale commercial harvesting of krill has occurred Despite the widespread distribution of euphausiids throughout the oceans of the world and their undoubted abundance they have only been harvested in large quantities in two areas in Antarctic waters and in the coastal waters off Japan There are however experimental or small scale krill fisheries in other areas and there has been speculation about the potential for such fisheries in still further areas This report summarises the available knowledge about the existing fisheries and draws together information on other species of euphausiids that have been thought to have commercial potential A number of other reports have been written on the commercial potential of krill particularly Antarctic krill Budzinski et al 1985 Eddie 1977 Everson 1977 Grantham 1977 Another relatively recent review Neal and Maris 1985 assessed the harvest of krill in the context of fisheries biology of other shrimps and shrimp like animals This report provides additional material to that provided in these reports but no attempt has been made to summarise their content except where it is necessary to understand new developments Much of the information on the fisheries for Euphausia pacifica is published in Japanese or is published in reports of fisheries agencies For this reason the biology of and the fisheries on this species are dealt with in some detail utilising these information sources which have not previously been readily available Kill Chain Andrew

Cockburn,2015-07-01 Kill Chain is the essential history of drone warfare a development in military technology that as Andrew Cockburn demonstrates has its origins in long buried secret programmes dating to US military interventions in Vietnam and Yugoslavia Cockburn follows the links in a chain that stretches from the White House through the drone command center in Nevada to the skies of Helmand Province The book reveals the powerful interests military CIA and corporate that turned the Pentagon away from manned aircraft and boots on the ground to killing by remote control Cockburn uncovers the technological breakthroughs the revolution in military philosophy and the devastating collateral damage resulting from assassinations allegedly targeted with pinpoint precision Vivid powerful and chilling Kill Chain draws on sources deep in the military and intelligence establishment to lay bare the failure of the modern American way of war

Conservation and the Use of Wildlife Resources Melvin Bolton, 2012-12-06 Not everybody cares about the fate of wild animals or the state of the natural environment I met a lady who said it wouldn't worry her if all the wild animals in the world disappeared overnight She was a city person she said There are also people who would prefer to let animals become extinct than to have them kept in captivity no matter how progressive the zoo There are those who on principle will not eat meat let alone do the killing and there are those who enjoy nothing so much as shooting birds People in the last two camps may oppose each other in claiming to be conservationists Extremists are unlikely to find their opinions being reversed by this book but because of the scope of the subject I believe there is a good chance that anybody with an interest in wildlife will find in it something new to think about It may not be too much to hope that a few disagreements might also be settled because I suspect there is more common ground than is generally realized among those with opposing views Fisheries and Aquaculture Gustavo Lovrich, Martin Thiel, 2020 The book provides a thorough exposition of the present knowledge across the major themes in crustacean fisheries and aquaculture in nineteen chapters Caravan of Martyrs David B.
