Commentaries for each area are provided by leading experts: Anne Greenbaum, Ake Björck, Nicholas Higham, Walter Gautschi, and G. W. Pete Stewart. Comments on each paper are also included by the original authors, providing the reader with historical information on how the paper came to be written and under what circumstances the collaboration was undertaken. Including a brief biography and facsimiles of the original papers, this text will be of great interest to students and researchers in numerical analysis and scientific computation.
