Brush-clearing Head Evaluation Andy Trent,2003 Describes the evaluation of a new steel bladed head for brush clearing saws that can be used to cut small diameter trees less than 2 inches in diameter efficiently The brush clearing head has an aluminum alloy housing with three replaceable steel blades that do not have to be sharpened The head eliminates many of the problems encountered when using circular saw blades to cut brush The new tool may make it possible to thin stands of lodgepole pine or ponderosa pine while the trees are still young and small Trees in these stands have usually been allowed to grow large enough so that they could be safely cut with chain saws The crowded stands were growing slowly during this period If the stands were thinned earlier the remaining trees would grow more quickly and wildlife species that prefer open stands would benefit However when trees are small they must be cut off near the ground during thinning to keep their lowest limbs from regrowing Making cuts close to the ground with chain saws can be dangerous and is tiring In addition chain saw blades must be resharpened when they strike rocks or dirt So must the blades of circular saws The steel blades of the head do not require sharpening but they must be replaced when the blades have become too badly worn In

rocky areas blades might have to be replaced daily The head throws debris that can cause injuries Operators must wear protective equipment Even though operators wore protective equipment during the evaluations they suffered minor injuries in the chest and groin **The Forestry Chronicle** ,1997 **Thomas Register of American Manufacturers** ,2003 Vols for 1970 71 includes manufacturers catalogs **Canadian Forest Industries** ,1967 **AMJ, Agricultural Machinery Journal** ,1985 Popular Science ,1982-03 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
