

O-rings must always be replaced when carrying out repairs. All moving parts, sealing rings and screw threads must be thinly coated with special grease for high-pressure cleaners 0781 145 3516 before assembling the parts. Exceptions to this rule are indicated in the text.

The permissible working pressure of the machine has been set on the safety control block by the manufacturer and must not be changed. A lead seal is fitted to the safety control block for this reason. After all the repairs are finish, the permissible operating pressure always needs to be readjusted with a new high-pressure nozzle, and the regulation valve block needs to be fitted.

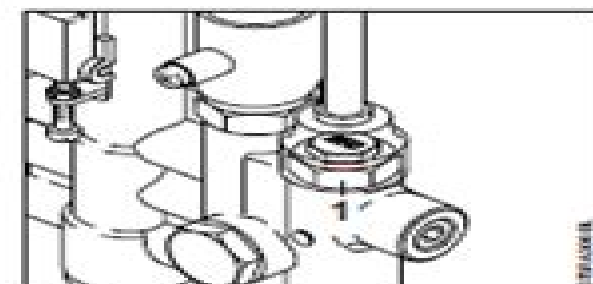

The regulation valve block can be dismantled into the following component parts in order to reach the main seals without changing the setting of the regulation valve block:

- Safety valve (1).
- Non-return valve (2).
- Flow monitor (3).

After removing the following components, the regulation valve block needs to be readjusted:

- Start-Stop switch (4).
- Reed switch (5).
- Control piston (6).

- Open shroud and cover:  
RE 521, RE 551, RE 581 (□ 6.1);  
RE 661, RE 961 (□ 6.2)

- Unscrew safety valve (1) with a size 22 insert (2)

- Pull safety valve (1) out of the regulation valve block
