Stone Age Stone Age 1:

The Stone Age in North America Warren K. Moorehead, 2020-09-10 Reprint of the original first published in 1910

Stone Age without Stones Raiko Krauß, Dan Ciobotaru, 2024-10-21 This volume deals with the results of the excavations from 2010 to 2015 at the Early Neolithic settlement of Bucova Pusta IV near Sannicolau Mare in northern Banat. After the end of the Early Neolithic settlement, a large burial mound was erected at this site in the early 3rd millennium BC, the main burial of which was also documented during the excavations. The site was subsequently inhabited once again during the transition from the Late Bronze Age to the Early Iron Age. In medieval times, the site served as a burial ground for a nomadic equestrian population. The flat landscape of northern Banat is characterised by numerous watercourses. This is why the utilisation of aquatic resources played an important role in the Neolithic period. Another special feature is the lack of natural stones, which is reflected in the special character of the Early Neolithic finds. **The Stone Age in India** P. T. Srinivasa Iyengar, 1926

Stone Age Sailors Alan H. Simmons, 2016-06-16 Over the past decade, evidence has been mounting that our ancestors developed skills to sail across large bodies of water early in prehistory. In this fascinating volume, Alan Simmons summarizes and synthesizes the evidence for prehistoric seafaring and island habitation worldwide, then focuses on the Mediterranean. Recent work in Melos, Crete, and elsewhere, as well as Simmons' own work in Cyprus, demonstrate that long distance sailing is a common Paleolithic phenomenon. His comprehensive presentation of the key evidence and findings will be of interest to both those interested in prehistory and those interested in ancient seafaring. **Stone Age Prehistory** G. N. Bailey, P.

Callow, 1986-06-12 Articles by John Clegg and Isabel McBryde annotated separately. Multidisciplinary Approaches to the Study of Stone Age Weaponry Radu Iovita, Katsuhiko Sano, 2016-05-28 The objective of this volume is to showcase the contemporary state of research on recognizing and evaluating the performance of stone age weapons from a variety of viewpoints, including investigating their cognitive and evolutionary significance. New archaeological finds and experimental studies have helped to bring this subject back to the forefront of human origins research. In the last few years, investigations have expanded beyond examining the tools themselves to include studies of damage caused by projectile weapons on animal and hominin bones and skeletal asymmetries in ancient hominin populations. Only recently has there been a growing interest in controlled and replicative experiments. Through this book, readers will be updated in the state of knowledge through a multidisciplinary scientific reconstruction of prehistoric weapon use and its implications. Contributions from expert authors are organized into three themed parts: recognizing weapon use, experimental and archaeological studies of impact traces, performance of weapon systems, factors influencing penetration depth, etc., and behavioral and evolutionary ramifications, cognitive and ecological effects of using different weapons. **The Stone Age** Edwin Oliver James, 1927 **Men of the Old**
