## **Stonehenge Cracking The Megalithic Code Two The Answer:**

The New Art Examiner ,1978      **Stonehenge, Cracking the Megalithic Code** David Kenworthy,2014 Stonehenge is an enigma Its secrets continue to elude modern archaeologists However only forty years ago the designs were almost uncovered Scientists with impeccable credentials wrote best selling books and made TV documentaries revealing astonishing theories It was an astronomical observatory It was built by prehistoric Einsteins who understood Pythagorean triangles incorporating these into the design using a constant unit of measurement They were highly organised surveyors engineers scientists and theologians Scientists at the time produced compelling evidence to support these findings Now they are virtually unknown This book investigates further with very surprising results The elusive code is now almost cracked      *The Stonehenge Codes* David P. Gregg,2014 What was the motivation behind the development of Stonehenge over 1500 years Was it a ceremonial site dedicated to the ancestors a currently fashionable view Was it a communal necropolis An exercise in sophisticated geometry A calendar for tracking the seasons and longer celestial cycles A calculator for predicting eclipses Perhaps at various times it was all these things Now Professor Gregg has gone back to reassess the design of the site and discovered many startling and unexpected patterns The same triangle and polygon geometry was used to scale monument features over the full 1500 year history Feature dimensions and proportions reflect key cycles of the Sun and Moon as do stone counts As a control the professor analyses the gear trains of the 2nd century BC Antikythera astronomical computer and finds the same often prime numbers in play Where the Antikythera device used rotating gears for its calculations Stonehenge used fixed stones and rotating priests Remarkably the same numbers turn up in Greek and Egyptian numerical myths and European folk memories speak of dancing stones or priests and taboos on ordinary mortals counting or moving stones at megalithic sites It also turns out that the geometry used and the astronomical cycles modelled have close connections to pi and phi the Golden Section in remarkable ways Could it be that the designers of Stonehenge recognised these strange coincidences between earthly geometry the great irrational numbers like phi and key celestial cycles As above so below Did these strange coincidences inspire the builders to record them in stone and perhaps to worship ceremonial and ritual there Did they feel the gods were speaking to them The professor also examines the case for the infamous megalithic yard and finds much convincing new evidence for its existence including its close and simple scaling relationships of several established ancient metrics These close relationships hinder the identification of which units were used at sites like Stonehenge Underlying all these metrics the professor sees a possible origin in geodetic scaling Remarkably at Stonehenge and many other ancient sites feature dimensions often are in simple fractions of seconds of arc This occurs at levels hard to attribute to chance He concludes reluctantly that at some early date before the unification of Egypt one or more cultures accurately measured the size of the Earth This geodetic measure was then used to calibrate primitive metrics based on human proportions probably through early trade links The professor concludes from all this material that our models of

intellectual and scientific development are wrong and that we have greatly underestimated what can be done with simple technology as the astronomical knowledge of the Greeks Babylonians and the Maya show us Just how much have we forgotten

**Alexander Thom** Robin Heath,2007-06-01 Professor Alexander Thom was a foremost scientist and engineer of the last century Once Chair of Engineering Science at Brasenose College Oxford following an already distinguished career in both the academic and industrial world during the War he had been Principal Scientific Officer for the design of the High Speed Wind Tunnel at the Royal Aircraft Establishment Farnborough and had assisted Sir Barnes Wallace in the design of the famous bouncing bomb of Dambuster s fame From 1934 Thom became interested in the megalithic culture that had erected the stone circles rows and other monuments in Neolithic and Bronze Age Britain He began to accurately survey these sites and in 1967 published *Megalithic Sites in Britain* Oxford where he claimed the builders had been skilled surveyors and astronomers and had used an identical and accurate unit of length to mark out their constructions throughout Britain a length he called the Megalithic yard 2 72 feet or 0 829m Thom also discovered that they were using a geometry based on right angled Pythagorean triangles triangles whose sides were whole numbers of this same megalithic yard or subdivisions or multiples of it He also proposed that they were observing both the sun and moon using precision alignments to identified sites or natural features on a distant horizon He even showed that they could have predicted eclipses The book was described by archaeologist Professor Richard Atkinson as a well constructed time bomb dropped through the letterbox of archaeology and it caused a huge rumpus within the profession In effect Thom had demonstrated that there was a huge missing component in our understanding of the Megalithic culture one that archaeologists had totally missed and that our model of prehistory was flawed and hopelessly inadequate In 1970 The BBC made a full length documentary about Thom under its flagship Chronicle series Magnus Magnusson amiably presented Thom s discoveries for the first time to a non specialist audience Once out in the open the archaeologists increasingly closed ranks while the informed public were enthralled Despite the top statistician of the day validating the Megalithic yard at the Royal Society and British Academy and despite several leading archaeologists supporting Thom he was increasingly marginalised airbrushed from the subject and forgotten Apart from the Chronicle documentary Thom s story has never properly been told until now Alexander Thom *Cracking the Stone Age Code* takes this fascinating subject beyond Thom s lifetime the author showing how and why the archaeology profession missed a huge opportunity to embrace a remarkable aspect of our prehistoric past one which carries huge implications for our modern culture

*The Stonehenge Solution* George Terence Meaden,1992 It s contents are as curious as its price subtitled *Language of the Megaliths* this is a book for believers in the Earth Mother with corn dollies megalithic art and sexual symbolism in abundance A sensible discussion of the origins of corn circles is followed by a complacent explanation of Neolithic and Bronze Age religion in Britain For the fringe archaeology bookshelves Aubrey Burl

The Stonehenge Enigma Robert John Langdon, 2020-12 This is a NEW third 2020 edition of the best seller that contains conclusive and extended evidence of Robert John Langdon s hypothesis that rivers of the past were higher than today which changes the history of not only Britain but the world In his first book of the trilogy The Post Glacial Hypothesis Langdon discovered that Britain was flooded directly after the last Ice Age which remained waterlogged in to the Holocene period through raised river levels not only in Britain but worldwide In this second book of the series The Stonehenge Enigma he also shows that a new civilisation known to archaeologists as the megalithic builders adapted to this landscape to build sites like Stonehenge Avebury Woodhenge and Old Sarum where carbon dating has now shown that these sites were constructed about five thousand years earlier than previously believed Within the trilogy Prehistoric Britain Langdon looks at the anthropology archaeology and landscape of Britain and the attributes and engineering skills of the builders of these megalithic structures Including finding and dating the original bluestones of Stonehenge Phase I from the quarry of Craig Rhos Y Felin in Wales five thousand year earlier than current archaeological theory and how this civilisation used the sites surrounding Stonehenge at a time of these raised river levels This unique insight into how the prehistoric world looked in the Mesolithic Period allows Langdon to explain archaeological mysteries that have confused archaeologist since the beginning of the science and allows us to make sense of these sites allowing us to understand their function for this society for the first time With over thirty proofs of his hypothesis and one hundred and twenty five peer reviewed references Langdon uses existing excavation findings and carbon dating to forward a new understanding of the environment and our ancient society which consequently rewrites our history books and allows us to find more conclusive and persuasive evidence which is

currently trapped in our landscape ready to be discovered by future students of archaeology     *Stonehenge Bluestone II* Neil Alexander Clark, Einon Johns, 2011     **How to Build Stonehenge** Mike Pitts, 2022-02-17 Icon of the New Stone Age sculptural and engineering marvel symbol of national pride there is nothing quite like Stonehenge These great sarsen and bluestone slabs arranged with simple graphic genius attract visitors from across the world The monument stands silent in the face of the questions its unlikely existence raises who built it Why How There has been endless speculation about why Stonehenge was built inspiring theories ranging from the academically credible to the improbable but far less investigation into how In the millennia since its creation pieces of Stonehenge have been knocked over by heavy machinery found their way to Florida and back again and been exposed to radioactive sodium but the seemingly impossible endeavour of raising the stones with Neolithic technology has remained inexplicable until now In the past decade ground breaking discoveries made possible by cutting edge scientific techniques have traced the precise provenance of the bluestones in Wales but can we plot their journeys to the Salisbury Plain And how might teams of labourers lacking machinery or even pack animals have dragged them 150 miles to the site How did they carve joints into the sarsen boulders among the hardest stones in the world and then raise them into place Mike Pitts draws on a lifetimes study to answer these questions revealing how Stonehenge stood not in austere isolation as we see it today but as part of a wider world the focus of a megalithic cosmology of belief ritual and creativity     *Mystery of Stonehenge* Franklyn Mansfield Branley, 1969     **The Secret of Stonehenge** I. alternative interpretation for Stonehenge based on recent research into renewable energy It shows how its plan layout is the same as an idealized geocentric fixed world description of the Universe its inner stone monument is shown to be capable of creating a spectacular visual description of a the sun s movement around a fixed world Part 2 shows examples of where that early knowledge of the Universe could have been obtained It also shows that in all the locations needed the monuments of that period appear to fit that which would be required Part 3 is about how the monuments would be perceived It shows how mythological and Arthurian references all appear to fit this explanation of Stonehenge and other monuments This offers an alternative explanation for the Grail and the Four Treasures of the Tuatha D Danann Part 4 looks at the most recent evidence published in 2012 Part 5 summarizes the possibilities with references in part 6

*The Mystery of Stonehenge* Nancy Lyon,1992 Discusses the theories and superstitions that have arisen throughout the years to explain the existence of the circle of stones at Stonehenge

**Stonehenge** Aubrey Burl,2006 Authoritatively researched new insights into Stonehenge s past Britain s leading expert on stone circles turns his attention to the greatest example of them all Stonehenge Drawing on forty years of research and fieldwork archaeologist Aubrey Burl offers a seminal new view of the changing cults and evolving architecture of Stonehenge Every aspect of Stonehenge is re considered in this groundbreaking volume Burl explains for the first time how the outlying Heel Stone long predates Stonehenge itself serving as a trackway marker in the prehistoric Harroway He uncovers new evidence that the Welsh bluestones were brought to Stonehenge by glaciation rather than by man And he reveals just how far the design of Stonehenge was influenced by Breton styles and by Breton cults of the dead Meticulously researched the book sets the record straight on the matter of Stonehenge s astronomical alignments Although the existence of a sightline to the midsummer sunrise is well known the alignment and the viewing position are critically different from popular belief And until now the existence of an earlier alignment to the moon and a later one to the midwinter sunset has been little appreciated One almost unexplained puzzle remains The site of Stonehenge lies at the heart of a vast six mile wide graveyard All around it are groups of earthen long barrows the burial places of Neolithic people many of whom died more than a thousand years before Stonehenge The mystery is that before Stonehenge there was a vacuum two miles across inside that cemetery Nothing was inside Why Burl points to an answer
