The British National Bibliography Arthur James Wells, 2009 *Clean Coastal Waters* National Research Council, Commission on Geosciences, Environment, and Resources, Water Science and Technology Board, Ocean Studies Board, Committee on the Causes and Management of Coastal Eutrophication, 2000-08-17 Environmental problems in coastal ecosystems can sometimes be attributed to excess nutrients flowing from upstream watersheds into estuarine settings This nutrient over enrichment can result in toxic algal blooms shellfish poisoning coral reef destruction and other harmful outcomes All U S coasts show signs of nutrient over enrichment and scientists predict worsening problems in the years ahead *Clean Coastal Waters* explains technical aspects of nutrient over enrichment and proposes both immediate local action by coastal managers and a longer term national strategy incorporating policy design classification of affected sites law and regulation coordination and communication Highlighting the Gulf of Mexico's Dead Zone the *Pfiesteria* outbreak in a tributary of Chesapeake Bay and other cases the book explains how nutrients work in the environment why nitrogen is important how enrichment turns into over enrichment and why some environments are especially susceptible Economic as well as ecological impacts are examined In addressing abatement strategies the committee discusses the importance of monitoring sites developing useful models of over enrichment and setting water quality goals The book also reviews voluntary programs mandatory controls tax incentives and other policy options for reducing the flow of nutrients from agricultural operations and other sources *The Thin Justice of International Law* Steven R. Ratner, 2015-01-15 In a world full of armed conflict and human misery global justice remains one of the most compelling missions of our time Understanding the promises and limitations of global justice demands a careful appreciation of international law the web of binding norms and institutions that help govern the behaviour of states and other global actors This book provides a new interdisciplinary approach to global justice one that integrates the work and insights of international law and contemporary ethics It asks whether the core norms of international law are just appraising them according to a standard of global justice derived from the fundamental values of peace and the protection of human rights Through a combination of a careful explanation of the legal norms and philosophical argument Ratner concludes that many international law norms meet such a standard of justice even as distinct areas of injustice remain within the law and the verdict is still out on others Among the subjects covered in the book are the rules on the use of force self determination sovereign equality the decision making procedures of key international organizations the territorial scope of human rights obligations including humanitarian

intervention and key areas of international economic law Ultimately the book shows how an understanding of international law's moral foundations will enrich the global justice debate while exposing the ethical consequences of different rules
