This manual contains warnings, operating and safety precautions for the STIHL FS 36 and FS 40 trimmers.

Pay special attention to the safety precautions outlined on pages 4 to 11.

Allow only persons who understand this manual to operate your trimmer.

To receive maximum performance and satisfaction from your STIHL trimmer, it is important that you read and understand the maintenance and safety precautions before using your trimmer. Contact your STIHL dealer or the STIHL distributor for your area if you do not understand any of the instructions in this manual.

Warning!

Because a trimmer is a high-speed cutting tool some special safety precautions must be observed to reduce the risk of personal injury. Careless or improper use may cause serious or even fatal injury. Make sure your unit is equipped with the proper deflector, handle and harness for the type of cutting attachment being used. Always wear proper eye protection.

STIHL's philosophy is to continually improve all of its products. As a result, engineering changes and improvements are made from time to time. If the operating characteristics or the appearance of your trimmer differ from those described in this manual, please contact your STIHL dealer for information and assistance.

Stihl Fs Service Manual:

Tree Farmer ,2000 Public Works Manual ,2002 Stihl FS 74, 76 Stihl, Inc,1993 Shrubs and Hedges Eva Monheim,2020-03-03 A practical ordinary person s guide to choosing planting and caring for the world s most popular plants Shrubs yet they don t capture as much attention as perennials annuals and even trees The front doors and picture windows of millions of houses world wide are adorned by shrubs Despite their ubiquity selecting and maintaining shrubs remains a mystery to many Shrubs are all too often inappropriately pruned into meatball shapes or alternatively left to become an overgrown tangle of branches But as you ll discover in the pages of Shrubs Hedges when cared for properly these workhorse plants have much to offer They mask foundations delineate property lines increase privacy stabilize soils provide food for wildlife and add beauty and interest to the landscape It s time for shrubs to take center stage Shrubs Hedges eliminates the ambiguities of shrub selection and care by offering Advice on how to pick the best shrubs for your growing conditions Plant profiles of both dependable classic shrubs and new rising stars Step by step propagation instructions for making more shrubs for free Shrub identification tips A lesson on the value of hedges and hedgerows The best shrubs for pollinators and other wildlife Pruning illustrations and tips to maximize shrub performance and health Tips for designing with shrubs Drawing on her decades of experience in the plant care and landscape industries author and horticulture educator Eva Monheim proves you don t have to be a gardener to see the value in this extensive group of plants *Industrial Equipment News* ,1970

Brush-clearing Head Evaluation Andy Trent,2003 Describes the evaluation of a new steel bladed head for brush clearing saws that can be used to cut small diameter trees less than 2 inches in diameter efficiently The brush clearing head has an aluminum alloy housing with three replaceable steel blades that do not have to be sharpened The head eliminates many of the problems encountered when using circular saw blades to cut brush The new tool may make it possible to thin stands of lodgepole pine or ponderosa pine while the trees are still young and small Trees in these stands have usually been allowed to grow large enough so that they could be safely cut with chain saws The crowded stands were growing slowly during this period If the stands were thinned earlier the remaining trees would grow more quickly and wildlife species that prefer open stands would benefit However when trees are small they must be cut off near the ground during thinning to keep their lowest limbs from regrowing Making cuts close to the ground with chain saws can be dangerous and is tiring In addition chain saw blades must be resharpened when they strike rocks or dirt So must the blades of circular saws The steel blades of the head do not require sharpening but they must be replaced when the blades have become too badly worn In rocky areas blades might have to be replaced daily The head throws debris that can cause injuries Operators must wear protective equipment Even though operators wore protective equipment during the evaluations they suffered minor injuries in the chest and groin
